The Christian who sees this process of peaceful conquest going on with steam-speed, cannot help asking what forces the Church has; what arrangements on foot by which to keep pace therewith. With effectual doors opening on every hand shall there he lack of men or means to enter? It is lamentably certain that the state of missionary and in our Church is in great deary zeal in our Church is in great disproportion to such large prospects. We make no doubt that Americans

make as good missionaries as the English; that Yankee genius baptized by the Spirit of God and consecrated to his service, will show itself as pre-emi-nently snecessful in preaching the Gospel to the Heathen as in other pursuits. The success of our missionaries to China; in mustering the language, must have been to us all u matter of thankful surprise. They not only are as accept among the missionaries themselves. And we have no deplit that the doctrine and discipline of Methodism will show itself as well suited to Heathen as to the spread of loliness in our own

Country.
The Government of England and that of the United States upon different sides of the earth will extend nath they men cach other and embrace the world with their laws and their literature; and why not with their religion? Well is hyfor the nations that they provoke one another to love and good works, and are as whose title reaches "from the river to the end of the earth." They stand ready for every new enterprise, to sow seed beside all waters; they anticipate and look out for it with insatia'de love for sonls, and it is difficult for the Minister of State to present his treaty sooner than the Minister of the Gospel presents his of grace and pardun upon the liberal condition of the Gospel.

OHAP 1 ... READING A CURISTIAN DETV. The counsel of Paul to Timothy-" Give attendance to Reading" - was doubtless intended for the benefit of all men, and not morely for ministers of the gospel. It is certainly a habit, in which every Christian should exercise himself; and, as it may be assumed that every man ought to be a Christian, so it follows that overy man ought to be hab-

the word "READING"? It implies something more than a carcless and rapil glance over pages which are soon to be thrown aside and forgetten. The word, as used by the A postle, in the ad-monition above quoted—(/Tim. 4:13) signifies, literally, Thornwan Knowlnicans, To know Accuration. The ex-pression—" Give attendance," in the original, is represented by a single word. and that word is thus defined : " To direct the thoughts to; to observe attentively, to hold tor-to-bring to; to mul in to shore; to land." Therefore - when I am exhorted to

give attendance to reading, my inspired Mentor means to inculcate upon me the duty of a close application to to get a vessel safely to the shore. This exhortation originally but not

exclusively intended for a minister of the gospol — has primary reference to u order to expound the living oracles. t is also commanded - "Stuby, to show hyself approved unto God."

But, as already intimuted, the injunc tion is not confined to the ministerin office. Upon hearers, as well as preachers—upon the flock, as well as the shepherd—upon people, as well as priest—the duty of close and faithful study is binding. Beyond the bread ocean-ser-face of books, which greet the eye in the

swelling libraries of the world, there lies a world of knowledge, beckening on the adventurer. The tides of that ocean must be met, and that yast continent explored. Who dares to fold his arms in sloth? Who is at liberty—even in this land of liberty - to live in idle ignorance?
"Books," it has been remarked by

some one, "are the seeds of THINGS.
They are the preserved essences of the minds that have lived before us. They see the armory of the human mind, containing at once the trophics of its past and the weapons for its future conquests Whatsoever is auchored in them, floats about in our brains."

This is a good idea : " that books are seeds." The sentiment of a book is intended in every instance to charge the then, a seed—a living principle, from fee; "for," said he, "suppose five hundred of you have business with me, and good or of evil. It is a germ or kernel, cither of wholesome fruit or balcful poisen. The mind of the reader, into which this gorm is east, is the teeming soil-wheuce truth or error, blessing or cursing, happiness or woc, will inevitably spring, according to the unture of the oach produce its like-cach after its kind. It is of immense importance that our reading be of a nature to profit. He who would feed the mind, and appears the cravings of our growing millions, commorting as they are for intellectual food, undertakes a very solemn duty. He ought to aim, not only at "the

greatest good of the greatest number" of minds, but at the best good of the best minds-at the highest interest of the Lord, if haply they might find him" (Acts 17:27)
Seeing, then, that all our reading

should tead — not only to our physical occurrer, and to our mental pleasures, but also to the knowledge of God ;-not only to the interests of this limited state of existence, but those of the life eternal ;—"for this is eternal life," that we might know " the only true God-and Josus Christ," whom he hath sent-it is rage him-that the fruit of his labor hence of great importance that we dis- will remain. Ilandboode Conduct of Type Endition at San Juan.—I was moch amused by an article in this day's Heraeld, anent the humanity of Englishmen at San Juan.—I had the fortune to experience the kind freatment of the officers of the Inflexible, on the occasion referred to, and am daly thankful fur the same. It is right, however, that you should understand the motive for this kindness. A large party of Americana had congregated at San Juan they were naturally indignant at the treatment to which their countryinan, Unit. Ellery, had aome time previously been subjected, and threatened to pat an end, in a very summary unamer, to the Edge-lish-usarpation.—In other to save the town, the commander of the Inflexible politicly volunteered to take the Arveircans down, to Chagras. The invitation was glasty necepted and for the attention bestowed: I, for one, are not unvoindful. Your readers, however, should understand the marker of the acts. We are glad Thus: there are many who believe that to be furnished, by himself, with the the institution of slavery was unwise and wicked, who also believe that the sudden or even speedy-extirpation of it would be still more unwise and wicked than its institution. Not the wisdem of original enactment alone, or chiefly must be considered, in determining th propriety of repealing au existing law but the influence which it will be likely to exert upon society, ought to be care fully investigated. I have no denbethat the General Conference errec I have no denb grievously, in legislating at all on th existence of slavery in the church, and that its legislation has been singularly inapt and unsuccessful: still, a state of things may exist, consequent upon that and asked me if I understood thin ... THE POPE'S ESTIMATE OF BISIN SHORES iln in his Neapolitan retreat, addressed an ency all letter to the archbishops and bishops of Italy he openly avows his hostility to Bible and Bible reading, in the following lar

"Among the verious lasidious measures of which the malicious memies of the shurch, and of society, endeaver te, avail themselves for seducing the propie, one may be specified as more especially prominent | which designs, namely, the recent improbements is the art of printing. Accordingly, they busy themselves in publishing profans books, lying joersals, and pamphlets teeming with the calumaies and falsehoods which they assiduously circulate in multiplied editions. Hence, too, at the instigation, and with the ald of Bible Societies, exhich have been denomined, again and again by the Holy Ses, they have the hardihood to carry on the distribution of the Sacred Scriptures, translated contrary to the rules of the church in the vulgar tongue, and most wretchedly perverted; and with a wicked and almost incredible affrontery, they scrupin not, under cloak af religion, to recommend them to the careful perusal of the faithful. From all this yon will understand, most venorable herethere, with what vigilance and solicitude it behoves you to not; so that the faithful under your charge may be put upon their guard against the poisson which cannot fail to be imbibed by the reading of such books; and may be carneally reminded, with a period reference to the Hoty Scriptures, then no person whatever is warranted to confide in his ewan jedgment as to their true meaning, if apposed to the holy, mother church; who alone, and no other, has received the commission from Christ, to watch, over the faith commission from Christ, and to decide upon the true sense and interpretation of the Sacred Writings."

Is it to be wondared at that under the influence of such spiritual instructors and guides Roman Catholic countries are whatthey are? If the ministers of Romanism are laboring under such instructions as these is it difficult to account for the m

PROPERT CHARGE IN THE LIABILITIES OF

Process Charge in the Liabilities or the Owners.—Mr. Hamilin has introduced a bill which is based on the recent British attante. It first relieves the ship newers from loss by fire, except when caused by their design. It releases them from all liabilities for the loss of precious metals, inveis and bank notes, unless the true nature and value of the articles is given, and these liabilities in all cases of embexilones, cook to their solution interest in the ip and freight. In the avent that the ship and freight are reight are me of symicient value to pay all the demages of the shippers, the proceeds are to he distributed are read. The officers and oraw remain liable for their acts of negligence or grong. The shipment of inflammable substances is forhiddeep withent a statement of their nature, under fine and imprisonment. The bill called ont a spirited debate on its first reading, and it will undoubtedly receive a careful examination before disposed of.

FLAX SPINNING.—The correspondent of the North American says: "Further experiments have this week been made at Manchester, (Englised,) with the recent discovery of adapting flax fibre to dotten machinery. The velocity of the electric fluid on the wires of the magnetic telegraph, according to Professor-Loomis' recent astronomy, appears to be 19,000 miles in ane second—or, in about one second the globe would be passed around—quiek onough for common purposes. The velocity may not be uniform, and this is far less than given by Wheatstone in England. The difference in the condition of the wire, and in its magninude, as well as the tension of the alectricity, as suggested by Professor Loominis, may influence the velocity of the fluid on the wire.

Population of the State of New York.—
The population of this State, by the late census, is not yet fully accertained. We think it will exceed \$3,100,000, on a careful estimate of the few countries to be heardsfrom, added to those which are complete. This will give us 33 members of Courress in the House, instead of 34, our present number, by which we may lose one. But we are in hopes that total population may be 3,200,000, in which case we simil retain our present number. The population in 1840 was 2,423,921. [N. Y. Sun. BUSINESS OF THE ST. Baltimore.—This city has made remarkable progress during the last ten years. Its population has advanced eighty per cent., viz.: from 100,000 180,000. Its public works and buildings have a service within its proclacis—1900 per year—actually exceeds the average number erected in New York.

This rank growth may be traced to a variety of causes. First, to the fertility of the soil around it, which furnishes a cleap and abundant supply of the necessaries of life. Second, to the cheapness of building materials, superior clay being found on the spot, and abundance of timber and fuel in its immediate vicinity. A vuet supply of lumber is also furnished by the Susquahanna rivor. Third, to the admirable position of like city as a distributing mer. Situate of the haad of the Chesapeako, it not only centrels the trade of Its befores, but being the point on the seaboard nearest to the Ohio, it has always commended a great wastern commerce, which has of interepanded with the progress of its public works. Foarth, the recent growth of Baltimore may be traced in part to its public improvements. The chief of these is the Baltimore to the Ohio, to fifteen hours. This work has long languished from the product to humber and which in 1852, will be carried through the Allephanles to Wheeling, and reduce the journey from Baltimore to the Ohio, to fifteen hours. This work has long languished from the prostrait credit of Maryland, but the Stain has resumed payment; her bonda are current, and the road is under contract to the Ohio. Even in its unfinished state, it now earns obout \$1,500,000 from transportation. Upon its completion, its business must be more than doubled.

| "I will only compare the present atto of things in that respect, with 1840. In the vicinity of Illical, in which is now Herrison county, there was at that time no eteam or weter mills, grist or saw, or envising manufactured. Now there are two fine steam saw mills, just started, and another being built; there are frur ship yards, where misty vessels ere built syd, repaired; a most estensive brick yord, producing \$60,000 worth of brick, annually; besides same other machinery, etc. In the vicinity of Mississippi oily, where only same half slozen families resided in 1840, and where there was no mechinery in operation excepting one steam and ene water mill, both long since out of use, there are now about twenty steam engines at work, entiting lumbsr, krinding, making shingles, lethe, etc.; a foundry for huilding steam engines, etc.; two brick yards, two ship yards, oto. For our groat improvement in mills, machinery, etc., we are mainly indebted to our ingelations and enterprising neighbors, the Messra flands, who have made most valuable improvements in machinery for sawing lumber, etc. There is also a planing, tongoing, and grooving mechine, sonn to, be started, by Messra Taylor & Fowler, which will greatly scillate improvements on our coest, and elso greatly enhence the value of mill property here.

"In the vicinity of Pass Christian in 1840, there was no mechinery at work. Now-there are five stoam saw mills, at least one brick yard, and what other improvements I know not, but presume there are abip yards, etc."

REPORT. The Committee on the Bible Cause

respectfully ask permission to make the following report:

The Bible is a message of mercy—a revelation of God's plan of saving sin-ners; it unfolds the nature of God, the requirements of law, the greatness of His mercy, the extent of His love, the rewards of bodience, and the fearful retribution of sin.

The Bible has declared to man his

unbelief, rebellion, implety, impenitence, ungratefulness, hatred to God, rejection of Christ, oto.; all of which it has led him voluntarily to renounce; and also, it has led him to cherish the amiable spirit of submission, repentance, confidence, hope, gratitude and love; It has taught him how be might obtain the mage of his Maker here, and shine with meral and cternal beauty in the king-

dom of God hereafter.
Wherever the Bible is circulated and read, pagan-altars orumble to the dust; the voice of prayer is heard; barbarous rites cease; men burst the iron chains of physical and meral oppression; conscience, enlightened and mode tander, asserts ber supremacy; a correct stand-ard of right and wrong is acknowledged; a sense of unbending equity and right-cousness is produced: wholesome laws are cancted; a high-toned morality, schooled in the practice of ennebling virtues, prevalls; vice and anarchy are held in check; public opinion, corrected by a standard so infallible, is girded with a power almost omnipotent, and arrayed on the side of virtue; idelatry, with its venerable and bloody rites, retires before the peaceful spread of the religion of Jesus Christ: the charities of the Gospel obound; darkness re-esdes; the true light shines; ameliorations make the desert sing; the refine ments of life flourish; churches, schools and hospitals the and fill the land, soud ing forth their benign influence, and shedding eternal lustre on the human race; the arts and sciences are culti vated; inventions useful to man are sought out : a bigher civilization is su

And why does its unrestrained violation every where abound in pagan lands ause the Bible is not there, like the rain and snow, making the wilderness bud and blossom as the rose; streams break out in the desert; and the distant solitudes of the Earth shout for joy.

Such is the Bible-ch, how precious! It makes doath to the Christian only a shadow; the substance is gone; the sting is swallowed up in everlasting vio-

The secret of the above representation is found in the fact that what is doubtless the religiou of this correspondent is on the decline in that country. Formerly, it had the ascendancy; and in the pride of its strength, irritated by the advance of Methodism, some of its injudicious friends commenced a relentless and infamens attack upon it-one which, for malice and falsehood, has bad no parallel in the history of the country. The friends of Methodism took the field and a reaction has taken place which has placed the assailants where they never expected to be. A Mr. Ross, of that region, could write a history of the whole centest, for he was there!

"There are other favored spots in this region where men are turning unto the Lord. May we not hope that this is a year of revivals."

The above remark, though containing nothing very objectionable, is nevertheless tinged with a sentiment which pervades many portions of the Church. We allnde to the last line "May we not hope that this is a year of revivals." Here revivals are spoken of as we speak of the crops, or any other event dependent upon causes unknown to us, or, at least, over which we have no control, nd not as events with which we have an numential connection. Southern institutions never suffer by a homo-view. The shortest way for one ralsed in a northern latitude to get rid of nursery prejudices against them, to broak loose from the meshes of abolition logic, and to acquire fraternal feelings towards slaveholders, is-to take the quickest rallroad and steamboat route, and "come and see." In this way hobgoblin terrors are dispelled and the dread of all those things that are not. Certain false perceptions of objects are to be corrected by coming closer to them. When these perceptions have become habitual and stubborn, this is the olly corrective.

"It cannot have escaped the observation of those standing at a distance to rail, the total and speedy chauge of opinion which their companions undergo who venture among the monsters. How readily they are reconciled! Tho change that passes upon them has every evidence of sincority. There is no question about this, unless we impugn the words, the deeds and the lives of a host, both in Church and State, who are great and useful, and in all their movements and interests are as integral a part of the South as though they were born here. And will those to whom they write back, persist in their denunciations? This rejection of concurring human evidence is rebellion against the laws of truth. Do they still doubt whether their old friends and companions are honest in what they report? We say to them, "come and seo" for yonrselves. Let it be repeated, the shortest way to truth and charity on this subject lies along the quickost route to the South.

Man, to a great extent, is the creature of oircumstances. For this reason we make great allowance for the religious. acerbities of our countrymen, our brothren at the North. If they could " como and see," they would think and speak sands of acres, neekly kneeding at the and sot differently. We indulge in no Lord's table and partaking the Supper and act differently. For the N. O. Chustina Advocate. Is it Practicable? Is it Desirable?

There is a strange desire evideed on the part of some of the wealthy and influential lay members of our church, to have a college established, under our di-rection, in South Alabama. This is an important matter, and should he well considered in all its bearings before any dseisive movo is made, That an iustitution of that grade, properly endowed and conducted, would greatly advance the cause of Education and Methodism, all/must admit. But can such an eudownent be secured? Do our wealthy That institution was founded and has Here, then, is a college upou

and labored with diligence and energy to rescue it from embarrassment, relying the money expended upon it, and run the risk of being thought fickle and bad managers by many of the public?

If this be best, why, let us go into it. But the proper persons to answer this puestion, it seems to me, are the persons.

D. R. Kellegg and Wm. Edwards among us who contributed the funds for Lagrange. At least, their opinion a new onterprise started. Can they agree? How shall we know, except by calling them together for donsult-ation? The writer of this does not The field is invaleulable, both in extent feel prepared to give a definite opinion upon the subject. He throws out these thoughts for the consideration of these interested, under the conviction that the subject will be up before the Mothe-

The Marine Hospital.

Mr. Editor-I was pleased with having the opportunity lately of visiting this vory useful establishment, now under the medical direction of Dr. MoKelvey, assisted by Drs. Porter and Knox. It is pleasantly situated on the ever-green banks of the Mississippi, opposite the Urescent-City. The building is di-vided off into a number of wards, with anuple accommodations for three hundred patients. I was informed, when there, that there were about uinety on the sick list. The average number is about one hundred. There were, during thio year 1850, admitted 1152, and but 66 deaths for the same time.

The annual outlays are something near \$20,000. The patients' rooms mid the doctors' apartments are large, light and airy. The halls, yard and walks are extremely clean and ucat, and bear every mark of much attention and good order. The wards are high, and the passages wide and well ventilated.

'Some alterations and new arrangements are to be made this summer, wit some improvements as it relates to play sical counforts. Would it uct reflect great and lasting credit on the moral and literary taste of the Superintendent and the Covernment, to institute and establish here an excellent library of well selected books?

There are men, in the Hespital, of oultivated minds, and likewise of extended information as regards the various parts of the world and its inhabitants. They, in time of health and prosperity mixed and mingled with society in all its relatious and dialects. But now they are deprived of all this mental en joyment. There have been, and will he again, men carried to that charitable house who have fought and bled, on board of our national ships, for our peace, and for the honor of our flag. There are others who have spent their best days and their wealth in buffeting the winds and waves, on board of on commercial ships, while freighted with a thousand comforts which we have in

These weather beaten sailors and sorely afflicted men are now cut off from thoso varied and social comforts, and from the privilege of the Gospel, and from public meetings. With these facts, and many others of like character, have they not an houorable claim on ou sympathy? Do we not owe thou all the enjoyment that we have in our power to impart? If so, lst Government be apthen let the Secretary of War be requested to furnish the Superintendents or Committee of the Marine Hospital with means which would enable them to purchase and lay before them a full and complete library, and employ au able struct on the Sabbath, visit and comfort the dying, and perform all other religious services, as the case might require Nearly all of our military posts and naval ships are furnished with good libraries and learned chaplains. May wo-not-ask why-this-unatter-has-bosn overlooked? Louisiana has deno much for our Republic—why should this in-stitution be passed by? Most people are in the habit of regarding the deluctions of philosophy and the inductive truths science as prosy things. It is really relieving a see them made to assume a possile aspect. And do they not admit of it! The discovery of these truths which edvance the haman mind towards that point of knowledge to which all its secret longings tend, should exche a higher feeling than any, mere creation of the fancy, how beautiful seever it may be: The phenomena of Reality are mere startling than the phantoms of the Ideal. Truth is stranger than fiction."

The fescination of a scientilio lecturer depends mon his realizing the poetry of his subject, as much as his comprehending the facts of it. He does injustice to science who pretends to leach it in its dull dotail, without any perception or appreciation of this divine quality; who cannot see any value in 11 beyond and superior 10-lts-mara-co applications. It has power to exalt the mind to noble contamplations, to inspire pleasing and long-lmaginations—and all this, without samplicing anything of correctness to remancing. The Society is fail at debt at this fiftee, and has on hand 5173. Since the anorvation of what is now the Eleventh and Twelith Wards, this territory has been explored with the following results: One man was employed one hundred and two days, at an expense of one dollar per day, to ascertain the oundation of the residents of these Wards. He visited 3683 families, and found 626 destitute of the Bible, he may be such a constitute families, the sopplied 461 with Bibles and Testaments; and the remainder, 165 families refused the gift.

Amonget b@men and emigrants at the river, ainety-eight days were apent—953 Bibles and Testaments were distributed, shout one-half of which were given away. Not one amougst this class refused the Bible.

THE CUMBERLAND ROAD. This measure The Cumeraland Road.—This measure, once the subject of so much contourion, has again come up in the Senate. There can be no doubt that the construction of a Ferleral road over one of the States is the extreme of the principle of Internal Improvements; and this system, so important to the West, soffered deeply from this particular themature. Mr. Benton has introduced a hill to give to Missouri its portion of the two per cent fund arising from the sales of public hands which had been pledged to the extension of this road. Mr. Clay spoke in opposition, and from his speach we gather some interesting particulars. The road wan gather some interesting particulars. The road wan

commenced in 1806.

"The Cumberlead road originated to March, 1806, It was head upon too two near cost, nearest-in the compact batweap Ohio and the Georgia. Government. That was to templated, what originally exceed, to extend only to the Ohio tweet, what originally exceed, the extend only to the Ohio tweet, what originally exceed, the extend only to the very great exactions made in the other transit of the Legislative, through the State of Chica and to Vandalla, la the State of Illinos."

The diatance is about 800 miles. It has cost \$55,000,000. The two per cent, fund of all the Western States is only \$1,343,281. The sum claimed by Missouri is \$230,000. But Mr. Clay shows that Missouri has been greatly benefited by the road, though it has not reached the State line. Mr. Benton's bill hes been voted down by a large majority.

The Opelouses Railroad.
We invited the attention of our readers on Seturday to a communication from Opelouses, is reference to a projected railroad from that place to Pointe Coupée, on the Mississippi. From causes apparent to any one who visits the Attakapas and Opelouses country, it is but little known to the rest of the State. Our people, while jaurneying to the North, or crossing the lake in quest of health, and to escape the scorobing isfunction of summer sums, have anyer been aware that, straighting from the averflowed lands of the Mississippi to the Sabine, and from the Gulf of Mexico to the high lesses south of Red River, lies a country ansurpassed for salurity of climate, excellence of water, fartility of soil, and all that can charm the lover of rural aports, by any portion of, the United lever of rural aporta, by any portion of the United States. But so difficult is it of access, that an in-

For the last few days he has been making examinations in the Everglades, and we shall probably receive a more satisfactory account of the character of that large and at piesent valueless tract of country, than we now have. The Everglades contain about three millions of acres of land covared with water. The general opinion is, that the soil is exceedingly fertile, and there have been many speculations as to the practicability of draining it. Could this be done, we should have a large body of land in a climate adapted to the cultivation of coffee, sugar, and most of the tropical fruits. [Savannah Republican.

It appears that the captain, two new hands, one a Portuguese and the other an Englishman, at Manilla, on ordering one of them aloft he refused to go, and as the captain advanced to enforce the order, the sellor clinched him and both fell upon the deck. At this moment the other sailor opproached, with knifs unsheathed, to aid his comtade. The captain manoged to draw a revolver, and with it shot the seaman with whom he was struggling in the neck. Springling to his feet, he oricumtered the other sailor, who speciaced him with its knife, and ohot him through the head, killing him on the spot. The other mutineer survived, although badly wominded. Copt. Gardener left his vessel at San Franciscu, and returned in the latest teamer. Antmal. Magnetiam.—Sir David Brewster, of Edinburgh, has expressed his conviction of the truth of Electro-Biology, or that part of Anhaal Magnetism which subjects the imagination of the patient to the will of the operator. He describes some remarkable experiments made before several scientific gentlemen, and concludes with the following statement:

They were all as well convinced as I was, that the phenomena we writtensed were real phenomena, and as well established as any other facts in physical solence. The process by which the operator produces them—the mode by which the operator produces them—the mode by which that process acts upon the initials of the patient—and the reference of the phenomena to some general law in the constitution of man—may long ramain makinown; but it is not difficult to see an the recent sheeters of M. Dubols, Reymond and Motiemels, and in the leave which regulate the relative elemity of the external and in veral impressions on the nerves of semestion, some not very indistinct inductions of that tenserable process by which indust in peculiar sensibility are tempararily placed-under the duminium of physical indicences, developed and directed by some living agent.

Letter from Bishop Andrew.

My DEAR BROTHER - I have res coived the first number of the New Orleans Christian Advocate, for which orleans Christian Advocate, for which accept my thanks. I think you have made a fair beginning, and hope your carly promise will be more than full-lilled in your future history. You occupy a most commanding position; in that he might use it to gratify his cwn that he might use it to gratify his cwn that he might use it to gratify his cwn respect, uene of our Southern Church papers can compare with you New Orleans, from its geographical po-sition, and from the influence of its commoroial relations, is the great empocossarily, to a great extent, the trade of the mighty Mississippi and its thousand tributaries, and destined to increase in importance as the beautiful and fortile lands of Texas become settled and California with its gold as well as its agri-cultural interests, and Mexico itself, shall by means of railreads become tributary to its woulth and onlargement. Indeed, its present position, without reforonec to its prospective greatness, would seem to indicate it as the point from which a more decided and extensive influence can be sent abroad, than from any other point in the Scuthern Uhurob. There the church eight to creet her heaviest batteries; from thence can be trusted—though Selemon has said such a thing will not be tried by a wise man.

Now we would remind our brethren to the select nor nearest patterns from thence the pulpit and the press should send forth weekly messages of wisdem and truth and power, uttored in the language of kindness, but with the faithfulness and authority of the Word of God. New Orleans is a great commerabominations common to all large oities I say not that 'tis worse than New York sconding order are Ethiopian Concerts, or other large cities; for angle that I Histricaics, Varieties, Model Artists, know, it may not be so bad, but then 'tis bad enough; that it is not worse than other cities, will prove nothing towards its salvation.

Iniquity abounds within it, nor will the enlargement of its trade or the in crease of its wealth, tend to correct the orals of its inhabitants; tive tendency of this increase will be to deepen and widen the stream of this corruption. With the increase of wealth comes increased demand for scusual gratification, in overy variety which the agenuity of a fallen heart can devise Thousands of young men are annually seeking employment in New Orleans, who knew and leved the Sabhath at home, and reverenced and loved the altar and the Bible of God, and shrunk with trembling sensitiveness from con-tact with any of those abominations which spring up as under hot house culture, in great cities; but coming to the great commercial mart, where the allabsorbing subject is gain, they have few acquaintances except in the way of business during the day, and much of the night 'tis business; and when vacant hours for relaxation occur, there is per-haps no kind-friend to take them by the hours for relaxation occur, there is per haps no kind-friend to take them by the hand, and lead to where those hours of South. I will certainly aid you all I to the work just about the petitioner? relaxation might be spent in the intelli gent and pious family circle; where in converse with cultivated and virtuous women, the mind might be unbent from work beyond that, and does he look for the drudgery of business, and both mind an answer away off there, as well as at and heart be purified and improved. In dofault of these, they seek association ultimately with the profane, the skepti cal and the vilo and the sequel is could told. It there is any place in the whole rauge of my acquaintance, where a vast accumulation of moral and spiritual power is ucoded, where we need a large number of men and women who are full of faith and the Holy Ghost, who will love Uhristianity in-its own simple garb and for its own sake, and who, while they live and talk and trade with the men around them, shall compel all to see and feel that their conversation is in heaven; and where the preachers should numerical strength. There is some he meu of single hearts, blameless lives, undying dovotion to their work -- men thoroughly imbuod with the spirit of their divine Lord, so that their preaching, their robukes as well as their en-oduragements, shall be with anthority, 'New Orleans is the place.' And it there

be any place where we need a press-which will at once speak wisely and in-telligently on all the great subjects, litcrary, scientific, or social, which shall arise in the history of the times, shall New Orleans is the place. The press is at engine of tremendous power, in any community, for weal or woo. We have been wout to talk or read of the power of princes, or parliamouts, or majorities, and in our own Church much has been thoy smile with equal complaceup on a rially alter the case.

Tite Army.—The Washington norrespondent of the New York Express says:

The army is to be atmeded in the House in general, and in detail. The Committee of Ways and Means demanded of the Secretary of War an entimate of the reduction of the army-expenses to five millions. Mr. Courad and all the army officers respond "the thing can't be dane." The Quarter Master General (Jesup) estimates, for his department enormous sums for transportation, and corn, leef; pork, llour, etc., etc., in Oregon, Chilfornio, New Mexico, and Texas, and this department has been the main one for running up the army estimates. Gen. Jesup wants nearly five millions. An army lifticer tells me that the Committee have can him down just une-half! With this feeling, there is, of course; no prospect of mounted tagements, or new regiments or any thing like it. In stating these facts, we would not be understood as presuming to dietate to any, but to express our conscientious convictions in reference to the subject.

What we ask for ourselves, the rights of What we ask for ourselves, the rights of conscience, we cheerfully concode to the entire human family. We contribute to the maintenance and support of our public schools by a proportionate quots of the takee for that purpose: let our buked by a shore of retirion. buked by a show of religion, antagonistic to their faith, and let the pasters of religion, according to the choice or wish of the parents and guardiane of the children, impart ench instruction as will meet

"Farmen Mullon's Ukase" - meaning ac disrespect thereby to that gentleman. Far be it from me to rail against any one—instructed as I bave been to honor all men." I Pet. 2:17. From this passage of Holy Scripture, I infer that it is my duty " to show respect and henor to all men, according to their rank

and anthority in eociety."

The fellow-citizon, whose name is signed as above, I have known porsonally more than ten years; and, through his writings in the "Catholic Telegraph," for some eighteen years back. Therefore, that respect which is due to gray hairs, he has from mo. Besides, he is suited to my respect in consideration of his position in society—connected, as it is, with our foreign diplomatic relations. To rail at a British or a Spanish consol or any other representative of a consul, or any other representative of a foreign power in our midst, would be nnmannerly, and of course unohrietian.
And so, it seems to mo wrong to bring a railing accusation " against a Roman Vatholio Priest; for, if I understand his position, he is the representative of a foreign prince, and is charged with armore delicate and more important

than the duties of a consul.

The precise import of the word

The Way for a Congregation to Kill of their Preacher.

In my last I gave you a few of the many ways by which a prescher might injure the Church, and kill off his congregation. In this I wish to notice some of the many ways by which a congregation may kill off their preacher.

1. When they hear of his appointment to the charge, be sure not to make any provision for him until he arrives with his family. Lot every thing rest unletty until you see the preacher and with his family. Lot every thing rest qulotly until you soo the preacher, and hoar him. Put off every thing until he arrivos, until something must be done, und done now. Be sure to make amplo provisions for your families. Lay in all-your supplies amply, and in due time, and with an eye to the most occnomical arrangement as to cash, but still let it be done without stint. But as for the preacher and his supplies, let that matpreacher and his supplies, let that matter stand until every advantage pass. Make an estimate of his supplies on a scale of close economy, based on cost of your supplies; albeit, the state of the case, compols the preacher to the loss of a heavy advance on his supplies, on that scale. In all this, let this be the solilo-

they acted with good intentions, and with such light as was in them. If a catholic priost demands our respect be their ability. This is a vory commen Catholic priest demands our respect because he represents a foreign Government with which we are at peace, much ment with which we are at peace, much members and some of thom wealthy, legislatures whose sessions are held—that nover give anything beyond a nom

4. Another way to kill off a preacher, is, to hang him up on the horns of impulse or feeling. Never give to his support, visit, or render him any aid, only as impulse or strong feeling may incline qu. Let these be the springs of acways be a feast or a famine; most generally the latter. Such inipulsive givers, consider what they give as an act of the parents and guardiane of the ohildrength of the is as the breath of a pestilence to her best interest. It invariably, and with forfal oortainty, does the work of death

for the preacher.

5 Another way to kill off the proache is, to misconetrue hie metives, words, and actions. This is often done. In no part of the land-have I knewn a church, whore this moral malaria did not exist to some extent. Toe often there is a etandard of action for the preachor, more rigid, than for any other processor, more rigid, than for any other class, especially more rigid than we subject ourselves to; and alse! that standard is as variant as are the fancies and whims of the members of his congregation. Every word, look and action must meet the demands of this hoterogeneous mass. Nothing must be said that can be construed into a reproof—into a reference to me to use. A failure in these respects on the part of the preacher, respects on the part of the preacher, though often it is as foolish as it is unsoriptural, is regarded as a good reasen for "speaking evil of ministers"—for absenting themselves from his ministry—of their hedging up his way to usofulness—of their hanging with leaden weight on his energies—of their killing him off, or killing themselves in the attempt to do so.

6. Another way to kill off a preacher is always to carp about the expense of

is always to carp about the expense of the charge; to throw out hints and suggestions about some other preacher being more acceptable; to hint in no equivocal way, that he is not the man. Do this to others as well as to the preacher. Let all be done that can, to make the preacher responsible for the action of the acceptables. Do this and if your

### Temperance.

It is gratifying to remark the character of the efforts now being made to promote ree of intoxicating liquors The Church the evils of dram-drinking and drunkenness. People not of the Church are promoting it energetically. No ie will complain of this. Let not the Ohueh suppose that her work is taken out of her hands. The reformation that thes cithes an almost or an altogether tian. These are the dangers on both sides.

According to the correspondence pub lished last week, Mr. Barnum of American Museum and Jenny Lind notoriety. delivered a temperance lecture in the Lyceum on Thursday evening last. The celibrity of the man drew an immense assembly; as for the lecturer, his reputation had to be established. After aring Mr. Bernum we set him down as no humbug on temperance. We never listoned to a more effective, racy. nets, fall of humor, full of argument,

and not destitute of persuasion.

Mr. B. acknowledged a penchant for carrievities, and declared he was in search of the man to whom alcohol, in respect of money, character, health, and every thing else, had not proved an unmitiza ted evil. Startling statistics, collected and arranged with evident care, dis-played the nature, forms and extent of the evil. In this city alone, in 1848, \$7,000,000 had been sport for intoxica, ting drinks. There were in it now 1019. censed dram-shops, and a large numher not licensed !

Whenever the gravity of the evil would admit, the riebest humor was abundantly interspersed. The harangue must be interesting which, as this did. could hold a mixed multitude together, partly standing, for an hour and twenty

After a sound looture against drink-ag alcohol, the locturer showed that the drinking neually done was not alcohol, but worse, infinitely worse. The adultoration of liquors was dwelt upon largely. Each feels that he Conference, did nearly all the pr has furnished his opponent an argument which he eannot remove; and each tacitly admits that he cannot void the case put by the other, and thus the matter rests. It will hardly be admissible to quote, to Americans, the opinions of those living under a monarchical goverument, however mild, in a case like this: it inust be settled by the Bible and republican logle.

> Among the labored efforts to adjust this vexed matter, that have come under heartily co-operating in the good my notice, is a sermon by the Rev. Mr. To God be all the glory in Christ-Storrs, one of the Editors of the N.Y Iudependent, in which he lays down, and argues at length, a proposition like this "Every citizen is bound to obey civil laws until they conflict with the law of God and each man's conscience is to decide where that conflict begins." This proposition is far more specious than valid or instructive. We are aware that conscionce is a very sacred thing with most men, especially with Americans, and most especially with zealots and fanatics. But still it is a very variable and falliblo guide. A pregnant illustration of this we have at the present time. With before them, who returned the fugitive Onesimus to Philemon, his master, the consciences of many of our Northern friends do not make them hesitate to brand the Apostle as a "kidnanuer," or to teach (indirectly) that Onesimus ought to have "struck him down," if he proposed such a thing.

The tone and action of conscience depend upon the projudices of its possessor, and the extent and character of his sor, and the extent and character of his information. TRIUMPHS OF THE ENGLISH LANGUAGE.

TRIUMPHS OF THE ENGLISH LANGUAGE.

ov Rev. James O. Lvoys, th. D.

Now gather all our Savon bracks,
Let harps and hearts be stung.
To relebrate the fritimphs of
Our ownselod Savon tongue;
For stronger far than hosis that march,
With battle-flags unfuried.
To rouse and rule the world.

Stont Allion hears its household lays,
On every surf-worn shore;
And Scotland hears lis achoing far.
As Orkney's urekers roat;
From Jira's cross, and Mona's hills,
It flocts on every gele,

It floots on every gole,
And warms, with eloquence and sonk,
The homes of Innisfail. On many n wide and swarming deck, It scales the rough wave's crest;
Seeking its peerless hentage—
The fresh and fruitful West;
It climbs New-England's rocky steeps,

As victor mounta a throne; Niagara knows and greets the vider. Still mightier then its own.

Stir mignier then its own.

It spreads where winter piles deep snows,
On bleek Canadian plains,
And where on Freequibo's banks,
Thernal summer regars;
If glads Acadin's mosty coasts,
Jamalea's glowing isle,
And hidea where, goy with early thowers,
Organ Texas' prairies simile.

And arrest where, gey with early flowers

Free Texas' prairies smile.

It lives by rienr-liascu's lake,
Missour's initial stream,
Where celtars' fise on wild Ozark
'ed Kanaas' waters gleam:
Through samest valleys rint!
And soars where California broka
Wesh down their sands of gade.

It sounds in Bomeo's enrudior grove,
On seas of ierce Malay,
It sounds in Bomeo's enrudior grove,
On seas of ierce Malay,
It fields that cutb old Ganges' flood,
And towers of 'proud Bombay;
It wakes up Adar's flashing ayes,
Dask brows, and sworthy limbs,
The dark Liberian soothes he'r ridd
With English cradle hymns.

The manis's tonids are wooed and won
in gendle Saxon speech;
Antralian boys road Crusoe's-life
By Solney's sheltared boach;
It dwells vipter A firs's southmost capea
Meet oceans broad and blue,
And Nieuveli's rugged mututains gird—
The wild and waste Karroo.

It kindles tealms so fitt apart,

The wild and waste Kavroo.

It kindles realms so firt apart,
Thet while ite praise you sing.
These may be cled with automat's fruits,
And those with flowers of spring;
It quickens lends whose mercor lights
Flame in an Arette sky.

And lands for which the Southern Cross
Hangs orbit lites on high.

Hanga croit litek on high.
It goes with all-thai prophets told,
And righteons kings desired,
With all that great uposites might,
And glutions Greeks admired;
With Shakspeare's deep and wondrous verse,
And Mittin's loftier mind;
With Alfied's laws, and Newton's lore,
'To cheer and bless mankind.

Mark, as it sprende, how deserts bloom. And error flees way,
As vanishes the mist of night
flefure the star of day,
that grand as are the victories
Whose monuments we see,
These are int as the daym, which speaks
Of noontide yet to be.

Of noontide yet to be.

Take heed, then, heirs of Saxon faine,
Take heed, not once disguee.

With deadly pen or spoiling aword,
Our noble tongue and race;
Go forth, prepared, in every clime.

Go love and help each other,
And judge that they who rounged strife
Would hid you amite—a, brother.

Go furth, and jointly speed he time,
By good men prayed for long,
When Christian States, grown just and wise,
Will scorn teverge and wrong:
When earth's nufress'd and savage irthes
Shall ease of pine or room.
All tevels to prize these English words—
FATTH, FREEDOM, HEAVEN und JIOME.

Representatives upon certain resolutions of inquiry introduced in that body by, Mr. Richerdson, of Jillinois.

A motion to reconsider the vote by which the bill for the relief of the Tennessee and Georgia Raifread Company, was laid on the table, was discussed, and then postponed.

A message was then repeaved from the President, in response to Mr. Glay's resolution. The President has received no official information yet in regard to the case.—He repeate the laws of the United States which authorize the United States Marklets to hire prisons for the confinement of persons. He also states had the laws require proclamation before the authorities can call this erection inflinty authority. He argue that this latteriate the meaning of the conduct of the case who took part in the affair at Boston, particularly the white men under whose instigations and instruments the defined in the lines steps. He demonded in row very mental terms, the proceedings of Mr. Geo. Thompson, of England.

Mr. Hule followed, pronouncing the proclamation of the President an impolitie, unwise, name and the confinement of the President and Mr. Hele rejained with much warmth, Mr. Mason contended that the law could never Ouban Prosecutions Ended. The third trial of Gen. J. Henderson, necessed of fing concerned in the late Cuben expedition, in lulenium of the Neutrality Lows, resulted in a mistrial. The jury were unable to egree on a verdiet. It is reported that there were eleven for acquitted, and one for conviction. The case was submitted to the jury late un Thursday, and yesterday more last they came late court, and acquired they came late court and acquired to the court of the came acquired to the came ing they came into court, and ennounced their disreement, and were discharged.. The District Attorney, Mr. Hunton, rose and remarked it would be impossible to empanel another jury. The cases growing out of the Cuban expedition had already nitracted at much attention, that the names of more then a thousand persons had been drawn,

He further remarked, that as he could address no stronger proof against any of the individuals with stand indicated to blast ofference we account of the least size. Indicted for like offences, on necrount of alleged you hallows of the Neutrality Lyres of Congress for par-Mi. Clay replied, and Mr. Hele rejuined with much warmth,

Mr. Mason contented that the law could never be executed without a change in senting in of the people of the North. To surrender no fugitive slaves, was a daty required by the Constitution. Massachusetts had laws upon her statute-books which firlude the execution of the laws by her officers and citizens. He held Massachusetts false to her federal obligations.

Mr. Clays agreed with Mr. Clay. He justified the acts of the President and had be lear but he would not be resident and had been found and would be executed.

Mr. Clay combined that the law wes worthless, as any frequently that the law was any frequently of the South; and to begislation could average the remained religitless was upon the institutions of the South; and no begislation could average certain down of the South.

Mr. Davie, of Mass., contented that the infair at Booton was one of those cases which might arise anywhere.

After further debute, the onessage was referred to the Committee of the South that the suffair at Booton was one of those cases which might arise anywhere.

The freight on these cargoes is about \$35,000, ead this the business of one port in one month. This sudden influx is easily accounted for. Formerly, the Northman find only the carrying trude between the Brazilian and only the carrying trude between the Brazilian and Norwegien pints. He carsied a load of lumber to Rio, aed-returned with so much of a load as his lumber yielded in coffee. His profit was on his outward cergo. But now he is sure of a return freight to the United States, and then uf another to Europe; consequently he sells his lumber fa Rio etsuch prices, that the American merchant cannot compete with Irim:

It is calculated that the Neapalitan army while routed in the first encounter, and that it is to be considered as the signal for a general tining all over Italy. Gaibbaldt in expected from New Yark with two vessels full af volunteers. His destination is Taugier, fram whence he will try to effect a landing at Naples. All these plans ore known to the Austrians, who are determined to occupy the Swiss tertilory in the apring, and put an end to this state of things. This affair will interest the French Government in the highest degree. A considerable arm has set apart for the purchase of arms also in England, and these calculations seem to be mode as if the certainty existed of completing the preparations for aguin lighting the illane of civil war over the whole of the Italian peninsula.

FAMINE IN THE CAPE DE VERD INLANDS.—The present condition of some of the Cape do Verd lelands, more especially of the Island of St. Nicolas, in such as to excite very serious apprehensions. In September last, St. Nicolan was nearly desolated by a hurricane, which with uawoned violence, swept the whole Island. This was soon followed by fever, the ravages of which have been truly appalling. In one town alone, Ribiera, Brawa, coataining about 5000 inhabitants, not less than 700 of the population have fallen victims. The prevalence of the fever at this season put a stop to all agricultural as well as other pursuits, consequently, the grops, then nearly ripe, were allowed to perish, and the others for want of hands to till them, have siace been also suffered to decay. Relieved in some degree as the people of San Nicolas aow are from the immediate agency of the pestilence, they are now threatened with another visitor one of its most dismal consequences. Famine, ganni famine, like a dark cloud, from which no lace there can for an instant be averted, hangs over the Island, and threatens to accomplish the terrible work of destruction, by unaking victures of those whem the lever has aparred. ANOTHER ETABLES. RATEROAD AUGITEMENT.—
The passengers on the Heusatenic Road had another narrow escape a short time since. One of the passengers furnishes the Albany Evening Journal with the following particulars:

The train was tunning at a rapid tate around a curve, a mile below VanDensonville, and twelve miles from the State line, when the twee passenger ears were threw from the track. In an instant tha tracks were torn of both ears. While in this condition, they ware dragged some thirty reds, when the hind car was precipitated flown the hand of the Ilbanstonic Rivet—a dintance of mearly seventy feet—thrning a complete somerset in its dannent, it was followed by the first passenger car; but having fortunetely become disconnected, it lodged when about its length down the bank, and at an heigle of about 45 degrees. The locomotive and haggage oar seem to have become disconnected the innment the passenger cars were thrown from the track, and ran a mile or more before the accident was dissavered.

I kinted the importance of her trying to infinence her husband to a course of morality, etc. I thought, however, I discovered a disposition in her not to pursue this subject; so prudence dictated a discontinuance of it at that

time. We, however, parted pleasantly. A few teenths passed new by when this lady, surrounded with admiring friends and caressed by an affectionate lus-band, was taken ill. These who loved her thought that one in such vigorous health could not be in ser every dans ness was unto death. Prionds, nor physicians, could stay it in its violent ongoing. A messenger was dispatched in haste to summon her parents to her bedside. They came but it was to witness her returnless departure into the land of shades and darkness.

Thus ended the life of this accomplished lady. Whither did her undying spirit go? We leave the revelations of eternity to tell. Ah! my heart was sad when I received the news that she was dead, and with it the invitation of her father to come to lis house and preach her funeral sermon. My hoart was oppressed while engaged in that solemin and melancholy task. I stood in the midst of a splendidly furnished parfor, lilled with mourning friends. When this had been done, then came our solemn burial service, and then the throwing la of the earth. While these services at the grave were going ou, her father, who had been to deeply grieved to weep, now gave way to his foelings. Illis stout and museular frame quaked, while tears relled from his eyes. I could but mingle my sympathics with his, and wish in my heart that he was enabled to serrew as those who have

The very interesting communication of the Secretary of the Alabama Conference reveals a startling fact—startling ming. Netwithstanding the revivals that have occurred in this portion of the Church the past year, there is, ih the summing up, a decrease for the year of thirty-one | Brethren of the Alabama Conference, how is this?

The position which the writer holds in this Conference, and his thorough acquaintance with its actistics, enable him to make these calculations, beyond mistake. # Methodist Reforms.

Under this heading we have some sig-ificant hints in the last number of tion's Herald. The present Editor of hat shoot, Rev. A. Steven, thinks of ig the post he has for a good while inguished ability, and belere quitting the Editorial chair intends age in the economy of the Methodist urch. In declaring his purpose, it is insied that modifications might be reduced which shall tend decidedly to its success . He proposes, in future

and the duration of circuit and station appointments.

This ennouncement has excited our Interest considerably. We believe with him that Mothodism is providential in its classification. It arose in the dehand of the times, and from its naturo can nover be behind thom. Adaptedness is one of its preminent elements. But there is ground for suspicion that in those contemplated modifications, a principle in Methodism as prominent and ssential to it as progress—itinerancy. will be sacrificed. Long before the division, it was currently said by Southorn Methodists that their Northorn brethren were tending to congregationalism and nothing but their influence kept thom from sottling down in it. Dr. G. F. Pierco prophosied this would suon be at General Conference of 1844. The ed to the Christian reader. the period of appointments.

COMFORTING REFLECTIONS OF A SUPER-NNUATED PREACHER .- We find the following in the Richmond Christian Adwill learn with pleasure the tranquil state of his mind and hoart, while they deplore his bodily disabilities;

I sustain a superannuated relation to the Chnroh, and the relation indicates the truth of my condition. I am pretty well corn out generally, and especially in the ergans of public speaking. Such is my hoarseness, particularly in the evening, that it is often with great diffieven though singing be omitted. ### Sabbath-Keeping.

Every indication of growing respect for God's holy day is a delight to his people, and an important sign of the growth of the kingdom of His Son. Sabbath-broaking is a sin under whose doep, hage shadew a multitude of other sins are fostered and partially ebsoured: Sabbath-keeping, likewise, is a virtue that stands not alone. Those who keep it conscientionsly keep it for some good purpose for many good purposes. It will be recollected with shame by

a twelvemonth, in American morality. At the last session, though much important business was crowding, a motion to hold a Snnday session was promptly rejected.

In other directions, there are pleasing signs that Christian sentiments are moulding public opinion on this subject. A very celebrated theatrical character, Charlotte Cushman, who hesitates not to bear a part in scenes on the stage, from which a Christian man or woman cannot be too far removed, refused, during her engagements in this city, to perform on Sabbath nights, though this night had, under the influence of Papists and foreigners, leng been the best of the

Miss Lind, who by her singing had won the werld's admiration, has, during the past week, set the world an example in Sabbath-keeping which, we hope, will be of benefit when the echo of her song dies away. She utterly declined taking a boat on Sabbath, though engagements fixed on her route, involving thousands te has enlisted in its behalf the of dollars, would be lost thereby. The elegance of the steamboat that was appointed to leave, the expense of delay, the interruption of concerts, any one of which would be a poor man's fortuneall those considerations did not overrule

the heliness of the Sabbath day. We record these facts with gladness not so much for what they are as for what they indicate. The leaven works, and the time will come, under God's blessing and the combined example and influence of his people, whon every Biblo ensetment will be respected by the world,

### The Cross.

Any thing that enlivons a Christian's intorest in this omblem of his faith should be earefully considered. All that associates itself with what was done and suffered on Calvary is doar to his hoart. It is well for him-to-dwell upon the agonies ondured there, in all their horrld detail and minutoness. He who lingers about those scenes of meck suffering, ef slow and mortal tortures, though It be in tears and sympathiziag pains, will come away the botter fer it. "bearing his cross." Accordingly, we find paintors ropresenting our Savionr bearing the ontire cross on which he suf fered. This, however, if we take into consideration the great weight the cross is thought to have been, from its size, and from its being made of the hardest wood, generally of oak, could searcely be possible; and painters thomselves have also been practically sensible of this, for the same painter who represents Christ bearing his cross, gives a representation of one shorter and more portable than that which he exhibits in a painting of the orneifixion. But this some imagine, may be correct. They think that the cross which our Saviour carried was a presentation of the cross of actual cruoffixion, and that it was usual for prisoners to bear such, to suggest to the people in the streets through which they were conducted, the kind of punishment they were about to undorgo. Lipsius, on the contrary, explains that the heaviest part of the cross, the perpendicular beam, was either fixed in the ground before, or was ready to be set up when the con-demned person arrived; and he contends that the part which the prisoner carried was the large cross beam to which the arms of the crucified were fastened. There are others, again, who think that blo, thoreforo, that it was the real cross which our Saviour carried, and that he was nailed to it before it was raised and fixed in the ground; which is in accordance with the general opinion. The mangraphically described: "Whon the mal-efactor had carried his cross to the place of execution, a hole was dug in the earth, in which it was to be fixed; the criminal was stripped; a stupefying potion was given-him; the eross was laid on the ground; he was extended upon it, and our soldiers, two on each side at the samo time, wero employed in driving four largo nails through his hands and feet. After thoy had deeply fixed and iveted these nails in the wood, they elevated the cross with the sufferer upon it; and in order to infix it more firmly and securely in the earth, they let it vi olently fall into the cavity thoy had pre-pared to receive it. This vehement precipitation of the cross must have cooasioned a most dreadful convulsive attack, and agitated the whole frame of he malefactor in a dire and most exeruiating manner. HEART WORK - Heart work is difficult work. Heart work is hard work indeed. To shuffle over religious duties with a loose and heedless spirit will oost no great pains; but to set thyself before the Lord, and tie up thy loose and vain thoughts to a constant and serious attoudanco upon him this will cost thee something. To attain a facility and dexterity of language in prayer, and put thy meaning into apt and decont expression, is easy; but to got thy heart broken for sin, while thou art confessing itunclted with free grace, while thou art blessing God for it to be really ashamed and humbled through the apprehensions of God's infinite holiuess and to keep thy heart in this frame, not only in, but after duty, will surely cost thee some groans and pains of soul.

Harvard College.—We lears that Professor Edward T. Channing has resigned his post of Boylston Professor of Rhetoric and Oratory in Harvard College. Prof. Channing is the oldest Professor connected with the under gradoate department of the college, having held his office for over thirty years. This long devotion to the particular branches entrusted to bis care, has rendered him poenliarly adapted for the post he now resigns, and as a verbal critic, he is probably amperior to any one else in the country. Mr. Henry W. Toyrey, who graduoted in the class of ISM, and who was for some time Tutor in History and Political Economy, is mentioned as most likely to succeed Professor Channing.

Rev. J. H. Ingranam.—This gentleman who, known as Professor ligratham, has been intimptely identified with the chasp literature of this country, for inany years past, has recently taken cherical homes. The Natchez Courier informs us that on Sunday last, he was admitted to the Disconate, in the Episcopal Church, at Trinity Church, Natchez, and intends shortly to remove to Aberdeen, Miss, to build up an Episcopal church in line, thriving city.

The cenera returns of Bernnuda have just been made oat, and show an increase in the population of 1155 in eight years.

By papers received at Bernnuda, from Antigos, it appears that at the capital, St. John, the Bishop. Archdeacon, and the Rector of the Parish, have been preaching Puseyite doctrines, and using the religious formula of the Romish Church, which gave, great dissatisfaction to the faity, and ultimately caused the very to reduce, the schry of the Rector from £350 to £128, the lowest legal amount that could be allowed in the Island. They also stopped the playing of the organ; and disnoised the organist, and were about to address the Archbishop of Conterbury, requesting him to put a stop to such a state of things.

SHOCKING MURORR IN MOBILE.—The Mobile papers have occounts of an atrocious murder of a quiet old man, Hernandez, a cigar manufactorer, who had located, there a short time ago. The murderers had covertly entered his store late at night, and their determination to commit the murder without any mistake, may be jodged from the fact, that when his cries brought passers by into his atore to see him weltering its his blood, his hody had sixteen wounds, thirteen of which were afterwards pronounced to ha mortal.

Three persons have been orrested on suspicious. There is a good deal of fonoance inixed up with the approach motives of the murderers.—It is said that jost before the time of the celebrated "Cuban Expedition," a discovery was made, which involved some of the largest merchants in Havana deeply with the Government—that the Gardenss alking the control of the country; that the Government, who, aware that the control, that the Government is more recently it has moved against these wealthy more recently it has moved against these wealthy more seen to make the country; that the Government public him evidence for ever, had located him at Mobile, and iolended to have him arrested and re-conveyed to Cuba on learning which, the porties whose secrets he possessed, aen to Mobilo the delegation of suasasing who, on Satarday night last, destroyed his evidence for ever. The Notornious Krilooge. By a recent arrival from the Upper Rio Graade, we learn that the outlaw. Kellogg, is again at his old games. Some few days since, he; is a company with a parly of eight; Kellogg at their head, made their appears ance are Reynous, and robbed a farmer of about a hundred hend of horses and mules. The secondrals with the exception of Kellogg, were all masked, but were recognized to be a mixed party of Mexicans and Americans. They are said to have compelled the marmed occopants of the rancho to herd the stock for them, and then coolly drove them off. A party of citixens inutediatel organized and started a pursuit.

The Brownsville Sentinel says that if Kellogg is taken his carease "will decorate some forest tree."

Railaoane—Thera Influence on Penperty.

The history of the railways of Massachusetts, and their influence upon the property of the State, are foll of evidence upon this point. Immediately, previous to the time our railways were projected, the property and histories of the Sinte had shout reached its maximum point of prosperily, and will-out the help of some new agency, seemed-quite as likely to retrograde as advance. The railways were projected and some of the times built, and the consequence was, an immense development in business and wealth. Real estate, especially, felt the genial influence. In 1834, the real estate valuation of the city of Boston amounted to \$21,590,300, while in 1849 it amounted to \$21,590,300, while in 1849 it amounted to \$21,590,500. In 1840, the total valuation of the Sinte of Massachusetts amointed, in round numbers, to three built died millions. This year, so far as the researches in 1848 it amounted to \$20,2837,500. In 1840, the total valuation of the Sinte of Massachusetts amointed, in round numbers, to three built died millions. This year, so far as the researches in 1840 in the summation of 1850, for the same total valuation of the Sinte of Massachusetts and the adjacent towns within a circum of millions of tholians. The voluation of 1850, for the same cities mpl towns, amounts, to aven hundred and fifty-six millions of dollars. Now these are fuets, extraordinary and wonderful as they may seem, and it is likewise a fact that this extraordinary increase is in consequence of the simulative effects of the railway upon the industry and husiness of the country. The increased value of real estate within the city of Boston, since 1840, will pay for all our Massachusetts railways, say, in round numbers, fifty millions of dollars."

tention of our peoplo. With regard to the first, the Finan-CIAL PLAN, it was adopted at a previous ession of our Cenference, when an unrecedented amount of business was beere us, and demanded our attention. The Plan, in all its details, was but lit-tle understood. It was likewise cucumeasons to which we shall hereafter refer. Of this feature many of our mest for. Of this feature many of our most intelligent and liberal laymen found fault; not that they objected to the thing itself, but to the place it occupied; but not intelligent all this, to use the language of the Editor of the Richmond Christian Advecate, in reference to our saccess, "at a single bound they (we) stoed along side of the Virginia Conference, who had been operating on a similar plan for several years;" striking our dividend at 70 per cent.; equal, if not beyond that of our hest days, when the Bisheps drew their support from the Book concern, and the Conference rement of from \$800 to \$1000 annually! Can there be n better argument in its favor? All plans and schemes, whatever they may contemplate, must be judged by results; by this test our Plan of Finance awaits the judgment and demands a verdiet in its favor from the whole Methodist community. Since the Edneational feature has been stricken Ducipline and Constitution of the Church

out, it includes only such ebjects as the warrants, viz : besides the support of the Bisops, the relief of the superannuated Preachers, the widows and erphans of such as have died in the work, and the deficiencies of those Ministers who have hored in poor and sparsely settled charges, and those, we are sorry to say, are not n few, if the deficiencies reported at Conference are a correct standard by which te estimate the paying abilities of many places.
This provision of our Discipline con-

invested with so much interest, and apple se eloquently and forcibly to the t feelings of our nature, as that of the wern-out veterans of the Cross, and the widows and orphans of those sturdy standard bearers of the blessed Snviour, who have feught their last battle, and closed their warfare on earth in victories most glorious for God and his Church! It well becomes us who survive them (and who soon like them may be called away from onr families) to devise plans and make most religious efforts to meet their wants, and, to some extent, relieve their most pressing necessities. Our example in this matter is being followed by our Presbyterian brethren; they are now engaged in raising a fund for similar purposes.
The writer of these articles pledged

came before the Beard to strike out the Educational feature, that he would guar-anty for the District over which he has. the honor to preside, that if the motion prevailed, that District would raise cvery cent of the amount apportioned to it. Brethren, Ministers and Members of the Demopolis District, will you redeem my pledge? Will you make good "our boasting on your behalf"?

The next item to which I would refer is the Educational Society. The crastre of the Educational feature from the Plan of Finance, left us, in that particular, just where we were. The children of Methodist Preachers, as well as those of every other person, ought to be educated. God and Beeiety demand it of us. Religion and Huuanity both say it "must he dene." The Church, and our children, too, would both reproach and oundern us if we fail to attend te, or neelest the stands as follows: Here is one Circuit from each District, the largest of course is selected:

Per White Member: or neglect this matter. But how is it to be done? this is the question. How meny of our most experienced and useful brethern in the ministry have felt the force of this question, and seen with agnish of spirit no other alternative but to locate or let their children grow up in comparative ignorance; and of these evils have readily chosen the least, and thereby deprived the world and the Church of much, if not the most, of their valuable services for life! It is true that it is the contract of the contract

sufficient to burden seme of them most lieavily, and enuse additional outlay for teachers, much to the embarrassment of Daleyille Grenit, 125 White Members, Balleyille Grenit, 126 March 125 White Members, Penusucal Salien, 126 March 126 March 127 Hems of the Alabama Conference. heavily, and enuse additional outlay for way of apology for the following remarks, that there are many things, among the doings of an annual Conference, of which if our people were better informed, and understeed more the formed, and understeed more the formed, and understeed more than the education of ohildren of thine at the every sunder thereof, they would more heartly co-operate with us in care trying those designs and plans into suecessful operation. Indeed, we never can be supported when the considerably and name and the considerably and the every constant with the "Approbation" is sued to be informed, and I wish the public to be informed. An end of the Conference of the Con clerical and lay members. If you will pard over without referring again to the don me, Mr. Editor, I will suggest that Enon Circuit, and the Franklin street you publish this Constitution in the Character in Metils Land Ch cesstal operation. Of this the framers of our flushclass by the Virginia Genference, (to why and wherefore, I am confident that the fine conviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same cenviction, on the part of more wearned and the same state of the same stat bama Conference will respond liherally that if our good brether W. 11. Meto the call for aid in this important undertaking. That they feel fer us, and degrable is accustomed. are ready and willing to nid us, so soon as some efficient system is devised, I can affirm from facts and evidences of the mest unmistakahle character.
The next and last particular I would

bring before your readers in this article, fervent wish that, if God spares us all is that of our Missionary Collections. This we will do mainly by, figures—not "figures of speech," or "flowers of rhetorie, hut by such figures as like "facts, are stubborn things;" and when denuded of all the ornaments of speech, will show up the boasted hencyclence of our dear brethren, we hope for you and sare neglected by their own Priests?

the New Orleans Advocato the most enwill show up the boasted henevolence of

It will be remembered, perhaps, by some whese eyes may fall upon this artisome whose eyes may fall upon this arti-cle, that in my communication on this subject last year, I endeavorade to show the possibility and ease with which we might raise at least fifty cents per each white member. This would make up the Missionary revenue from this Cenfer-ence to \$16,399, instead of \$12,071 39 as reported at our last session, according to the ropert of Treasurer now before me. The ground upon which we rest the assumption that we can, with proper effort upen our part, raise lifty cents to each white member, is the fact, that some places do raise that amount, and over, while others of equal ability, and perhaps of equal willingness, fall very fur below it! The question then arises, where is the fault! Well, here are the facts and figures of which we speak; and we think n very little thought or acu-men will furnish the aaswer.

The basis of the fellowing calculation

is the white membership within the bounds of our work, and on this we have calculated the amount collected per member in the whole Conference—the amount collected per member in each of the several Districts-and the amount per member collected on each of the most prominent Stations and Circuits. This will narrow down the matter to a single point, and show how far below this average many of our best collections

I. In the Conference entire, as be-fere stated, there was collected, 812,templates the most worthy objects of Christian benevolence. What chiect is previous year of about \$3000, but only

Lot my one acquainted with the above rainable services for life! It is true that in most of the literary institutions and rour care, the children of Itinerant Ministers are received free of charge for lettion. But how few one avail thomselves of this! To secure the advantages of this! To secure the advantages of this provision, we must incur the expense of boarding, and this very few, comparatively, can do, as every man must know who has any ilea of a Methodist Prencher's salary. on a pleasant morning in May I wont on board the Jane Hammend, an English ship then lying at anchor in the Apalachiceln Bay, opposite the town of the same name, being on the senthern ceast of West Florida. She was laden with seine twe theusand bales of cotton, beind for Liverpool. I had two reasons for sailing in an English cotton unerchant-ship. First, that a ship sons for sailing in an English cotton tackles, hunchant-ship. First, that a ship freighted with cotten will not sink, filled circle for freighted with cotten will not sink, filled with water; and oven if she wrecked, would not founder before discovered by unpleasant eder, and are not fit for food would not founder before discovered by unpleasant eder, and are not fit for food will be some vessel, as seldem one is out of sight on the ceasts more than twenty they have not be back and jaw. Been to follow the chip more for as useful to the country of the second s

sight on the ceasts more than twenty of feur hours. Secondly, from an English master and crew, a person may learn the habits of scafaring life adapted to the English, besides derive information concerning the enstoms of a nation almost wholly different from our ewn, among whom he is to sojourn. Our cempany consisted only of the master and his lady, with an intoresting little daughter, besides the officers. I took on board suitable books for reading, such as the history of the several countries I intended to visit, besides one of our modorn School Atlases, as no map will be found in Europe so convenient; and withal, a large quantity of newepapers, which will prove very companionable.

Our househeld conveniences consisted of a reemy cabin, with a pleasant atternative, and whose household geds were a full supply of oackling fowls and gruntillings, and other appendages unnecessary to matter, and specific provides all of which are necessary requisites for a long seavoyage of nearly five thousand miles.

The declaration of our Savient to the Jews in the temple is a prominent passage. "My sheep," says he, "hear my voice; and I know them, and they fellow me; and I-give unto them eternal life; and they shall never perish, neither shall any pluck them out of my hand." Christ, thus exhibits his disciples as objects of his tenderest and most unxious pasteral care. Now nout but true believers are disci

Verily, this will be paying dear be regarded as his disciples, and that he does not refer to them as individuals abstracted from their moral traits and relations, is evident from the verse just preceding those quoted. "But ye helieve not," says he to the opposing Jawe, "because ye are not of my sheep." The remark must be atlowed, in passing, in regard to this text, that Christ does not say that they believe not, because he, or God the Father, has not made them to be of his slicep, but because they are not of his sheep; and why they are not, lie does not here say, although elsewhere he charges on mankind that they will- no come to him for life-that is, be uum bered among his sheep. GOLD IN ARKANSAS .- For many years geologiets have anticipated the discovery of gold in the primitive formations of Arkansas, but until within a few months, we believe none of the precious metahad been found. Tast attained a pragical miner-ologist, of this city, made a tour through the west-ern and northern, portlonic af-the Statu; he found the bitumnions and anthractic coals in great abundance in the sandstone region. While among the mountains, he found vast quantities of iron, lead and copper. He found in situ, gold melted in the quartz, and he returned fully convinced that somer or later, gold would be found in abundance. This week a gentleman from Arkansas bruoght to this city for analysic neveral masses of quartz and gold, from which were extracted \$193 of gold, of twenty-three carate line. The gentleman left to-day for this new California. The rock and are are precisely uimilar in appearance to the oru brough from California. The Ozark Mountains of Arkan san are of the primitive rocks. There is evidently a tendency in the public mind—the social feelings ae in for their share: When and relations—and in the demostic cir oumstances of its ministry, to settle Methodism in the Parish. When this is accomplished, Methodism as a new though it may still exist and operate as only be met by two counteractives: the naintenance in the ministry of deep piety, producing an elevated spirit of devetion and self-sacrifice, induing the whele body with the missionary spirit. making them willing to de any and all work for Christ and souls, and the provision hy the church of a mere ample ging and outlay of capital, furnished atum a multitude of organizations are formed and ageueics sustained by onr sister churches. The preposition to the sort of pront contemdevelopment of the local tendency felt bound to abeve alluded to. the wern-out system of others.

And that are the grounds upon which this change is desired. Whatever may

be set forth, one of the main ones is the trouble attendant upon frequent removals. Here is trouble, and the writer movals. Here is trouble, and the writer of this has known it for twenty years. But was it not so with corfathers? Had they not families? Had they not as long comeyals to make? Were parsonages incre commen and better furnished that these new? Were reads better than new? Or have we discovered are itinerant system is net the most

menent plan of saving souls? If we have then the peculiar mission of Me-thodism is finished. If we have not then the spirit of Christiau enterprise, the spirit of the new dispensation is on the wane among us, just in proportion as the desire for this change prevails for this ground. But it is said that when a minister has been with a people jong enough to make their acquaintance more useful than a stranger can be. to confidence, the endorsement of Annal Conferences cught to be a sufficient guarantee, beth as to piety and ability, to command the confidence both of the church and ecumunity. It is so with all reasonable men. This is one of the all reaseuable men. This is one of the advantages of our peculiar economy and system of mutual supervision and annual examination. Desides, the minister desirous to de se, can, with the aid of his official members, seen make the acquaintance of his tlock. And the acquaintance of his tlock. And the acquaintance of his tlock. And the acquaintance of his tlock and the medium of leader acquaints and his field to commence at once his artistic pastoral duties. But a stronger reason

pastoral duties. But a strenger reason for desiring this change is, the fear on the part of many that in parting with an acceptable preacher, they may get one whe will not be se, and thus their turch may be injured by the change. A complete remedy for this would be tought in a sufficient ound in a sufficient number of competent and devoted ministers—so that upon my onange, each church might fell sure of being well served. This is the desider turn to the church. Now what will scure such supply? Under God Ged, a proper spirit of picty in the men, and a proper provision for their support. In England, among the Wes eyans, where this has been dene no difficulty is found in maintaining an itin-erant ministry in full force and efficienerant ministry in full force and efficiency. Men of the very first order of talents cheerfully and heartily continue in it through life. But it is expecting quite teo much of human nature, under ordinary circumstances — more than Provide — requires—to expect men of education, talents and promise, before whom all the honorable walks of society and the roads te distinction are onen and around whom are

tinction are open, and around whom are all the ties of social and demestic attraction that hold and control the rest of mankind, shall devote themselves to a work, giving only a scanty and precarious subsistence—affording no nicans for giving their children such an educafor giving thoir children such an education and such accomplishments as will fit them for the better walks of seciety—affording no hope for acquiring and leaving a competency for a family should they have one—while all around them pessessed of abundance are going quirely with little later (au process and etly, with little labor, few crosses, and less self-denial, to enjoy he same heaven with themselves! The meager support afforded the ministry is the prolific afforded the ministry is the prolific source of its feebleness in numbers and talents. Many, who would have proved highly useful to the cause of Christ, have by this been forced from it into ether pirsuits for a living; and many others, who would have made able ministers, who would have made able ministers of Christ, have been deterred from the communicants of the various religious professions: isters of Christ, have been deterred from entering the sacred calling. Some in the church have said that if the iniuistry were more efficient, it wenld com-mand a better support. If this be true, theu two evils have mutually acted upon

and aggravated each other.
Still we think the imprevement must begin with the church, while we freely admit that the Conforcuces ewe it to the cliurch and themselves to he mere particular in the admission of men to sacred office, and not to allow any to attempt its functions who are not qualified for them. Here, then, are both the source and nature of all the reforms Methodism needs, and all that reasonable men can ask of her. No organic or functional changes are called for only such as are montal and circumstantial—such as are fully within the power of the church. Dear Bro. - My last sheet concluded the first evening I spent on the sea. Nothing of interest occurred the first Reflections.—Religion more than compensates for all that is done or suffered for its sake. It trial it gives peace—in death it gives comfort—after death, Heaven. There was a place in Heaven for the soul; but there is nene for uissay. I cannot speak in praise too exalted of our captain, efficers and crew.

On the 6th of November, the face, to sea exchanged the placidity which is do worn ever since we had left Beste that the marker—and of which I really began tiled by old Neptune as cellectors trihute from the poor retching passe; ger. It is embraced in the "order" which the Apostlo Paul enjoins upon the Churches. No branch of the Church or well organized body is without its formula of proceedings. Propriety and convenience, dispatch and harmony are involved.

We do not expect to bring ont any thing now ou this subject, but merely to remind these who conduct public wership after their own various ways, that there is a rule—a rule not without reason. Meanwhile, we shall maintain our post of vigilance, and give due attention to ether, matters as they rise: These

te lock very pretty; but when the waves only "kiss the clouds," when the latter stoop to the embrace, and when the hewels of the spectator yearn, not in "sympathy and tenderness," but in sickness, it is quite a different matter.

As night came on, the clouds began te gather, and a fine mist commenced falling, changing the whole scene into one of dreary melancholy. Friday merning, I saw the perpeise in great numbers, gambeling about the ship. As they would leap from the water, and then back again, I thenght them the most graceful divers I had ever seen. This day centinued se cloudy that conficers were unable to take any observations during the day—ee that we could net determine our latitude er longitude. Cape Clear before the next morning As night approached, the winds and weather were still mere unfavorable During the night we would he on the Irish Ceast. Onr cautious captain, kuewing full well onr danger, quietly ordered the small boats to be ready for any emergency, and for life-preservers to be placed in each, se that there would be no unnecessary delay in the event of disaster. Every lialf bour the ship was ordered to be stopped and the fathon

line let down.

At half-past three in the morning I was suddenly startled from slnmber by a sheek of the vessel. A friend, who had gone above, returned with information that the ship was fast, and that net an officer on board could determine our whereabouts. The weather was very celd, and a dense fog enveloped ns, so that no object could be seen at any distanco from us. We could hear the snl lon and threatening roar of the breakers ou either side, but knew not how to escape them. As you may well imagine, there was no little alarm and excitement

As I passed the saloen, our minister had collected a number of the passengers on board, and was at prayer. It was a moment of sclemn awe, and of deep and intense feeling, as he read the beau tiful and appropriate words of the 46th Psalm—"God is our refugeand strongth, a very present help in trouble. Therefore will we not fear, though the earth be removed, and though the mountains be east into the midst of the sea. Though the waters thereof ross and be troubled the waters thereof ross and be with the waters thereof ross and be with the waters. though the mountains shake with the swelling thereof. \* \* of Hests is with us; the God of Jacob is our refuge." Not a heart was there, in that throug, in which were persons from many nations, that was unmoved; and net a lip but murmured an erise to Him "whose way is in the deep."

No one, unless he has been in like peril, can imagine the swiftness with which the mind acts particularly the memory. Swifter than lightning, I hurried through my past life. It stood bare before me. It seemed as if I thought of every thing of which my hitery was made up, in a moment of time. Incidents that had been undisturbed for years—sleeping in their forgottenne were shaken from their places of sepulture, and stood before me fresh from their

We had a ungniticent view of Dublin far at sea. The spires, domes and monu-ments, wore clearly visible above the city itself. Duhlin has one of the finest harbors in the world. The bay, spread out before the city, resembles the bay of Naples. Quays run into the sea on cach sido to break the waves, so that in dofinnee of the storm, ships lie safe at anchor; besides, there is another excellent harhor at Kingston, four miles south of Dublin, and is connected by a railroad. But the race of this benutiful water sleeps on, searcely interrupted by commerce, as all the rest of the sea-ports on the Irish coast. Dublin is divided by

the river Leffey, a pleasant stream. Th unmber of its inhabitants are 240,000 Lird Nelson's monament stands in rentral spot, is 440 feet high, and built of granite. On the top is a splendid view of the whole city, which is compact lying on a plain, and is neatly and regularly laid nat. A more genteel class of people walk the streets than in Liverpool, though the streets are not so threaged. The Irish emigrants to America are not exactly a fac-simile of the nation. The higher classes are not excelled by any country in person, manners, or language. Near the waters of Leffey stands the

The gorgeous scenery and tasteful gardens display an abundance they know of themselves. That there are poor, it is not doubted. The peasantry are much inclined to indelence, and rather leg than work. It is a, matter of profound joy to us that the Quar. Conference of Vicksburg has sympathy enough, and to spare. But if I was not afraid of Vicksburg chivalry, I would remind the Quar. Conference that their notice of their sister Church, and their sympathy with its "pious men and women," might be considered both indelicate and unjust. It is not long slace "our sister Church" at Vicksburg lad enough to du to take care of itself, and some of its members sent out over the land great handbills, half as big as a new sparer But I did not hear that any of the sister Churches interfered; and I know that neither Woodville or Natchez did so. ASTOUNDING IGNORANCE. The repor of the Register General, recently, pub lished in London, discloses n depth of ignerance and debasement among the poorer classes of Great Britain, which would he incredible, if it were net vouched for by efficial records. A Londen paper of the 17th ult., gives a syacpsis of a portion of the returns, from which we learn that one half the ponu-lation of England and Wales are unable to write their names. During the years 1839, 4840 and 1841, out of 732,788 persons married, 303,830 affixed their marks to the marriage registry hy way of signature. In Menmouthshire and Wales, 48 males in 100, were unable to write their names, while in Cheshiro and Lancashiro 40 per cent. of males and 63 per cent. of females, were similarly disjualified. At the jail in Preston, Lancashire, of 1622 persons committed dir-ring the year 1844, 40 per cont. were nnable to name the mouths of the year, were ignerant of the reigning sever ign, 42 per cent. knew not the imporof the words "virtue," "vice," "righteeus ness," ote., while 13 per cent. were una ble to count one hundred. CINCINNATI, Merch 22, 1851. REV. H. N. McTyeine Dear Brother—According to prunise, I now write you a few lines. My trip on the river was very tedious; it took me twolve days to come up. I found my old friends in health and prosperity.

My son has grown much since I saw him last, tw years ago. He was very glad of my coming. ' The work of the Lord is prospering in Cincin aati, as well as in. the vicinity around, especiall the German cause." The Lord has done wunderfu the cernant cause. The Lord has done withders the state of the thermals in this place; the is but ten years since I left this city; then those was but a small society—had no church of their own—but supall society—thad no church of their own—but, now they have three commoditus churches, in the city, and a mombership of between five und six hundred. They also have a smull frame church in Newport, and a gruwing society. This is the Lord's dolugs, and it is marvellons in our eyes. The prospect of succeeding all last among the Germans, in overcunning their projedices, and of planting muning them the truth as it is in Jesus, cheers my such. My courage is renewed, and my faith the utilities of the course of the cour my sout. My courage is renewed, and my faith strengthened to go on and prosecute the work lusticly and cheerfully in New Orleans: 'we shall coaquer—yea, in the all-prevailing name of Jesus we shall! ### Making Secret Prayer Pleasant.

1. Be regular in the observance of it Arrange your affairs with reference your daily seasons of retirement; and de t with just as much purpeso as with reference to your ordinary meals, aud, if you are ever irregular in the latter, with more. More depends upon this than mest are aware of. 2. Watch over your life and conver

sation. If you suffer yourself to be be trayed into any irregularity of conduct ivolity of conversation, it will pres like lead upen your spirit as you enter your closet. There is meaning in the words of the Apostle - " Watching, thereunto, with all perseverance." 3. Prepare for it by meditation. The mind that has been engressed, as it is sometimes necessary that it should be,

tself that it may gain a preper attitude to commune with Jehevah. You must labor to secure the conception of a prosent Ged. You are alone, with grieved, offended yet compassionate friend. That friend is He before whom he angels veil their faces. There must he a preparation in order to enter suitaoly into communion with him. 1. Read, in connection with your de

votions, a few pages in such works as Baxter's Saint's Rest, Kempis's Imitation of Christ, and, aheve all, devotional pertiens of the Bible.

5. Let your heart dictate overy word you utter in the form of prayer—in other words, do not go to the closet merely to discharge your conscience in relation to the duty; but go there to unburden your soul of its emotions; and while there, do not utter words significant of desire you do not feel. If you have not the emotion which you eught to have, do not mock Ged by expressions which signify its possession, but meditate and pray for it till it is awakened

and when it comes, utter it.

6. Pray much to Christ. He can be touched with the feeling ef-our infirmi-ties. He was tempted—tried—in all points, as we are, and presents himself before us in a form to meet our sympathics and invite our most confiding approaches. Why did Stephen, in the hour of his trial, pray, "Lord Jesus, receive my spirit"? There is a volume of instruction in that prayer. It points us. to One who, having tred the path of temptation, suffering, death, bears toward us the heart of a brother-that can he touchod combined with emnipotence te savo.

> St. Louis is truly a fine city, exhibiting in its be ness-streets evidence of an activity and enlighteen enterprise in commerce and manufactures, which its future greatness and high rank among the cits of our rapidly growing Republic. Its dwelling are comfortable and elegant in appearance, and it Churches are sufficiently numerous and magnif-cent to impress a stranger with the idea that the point for missionary effort in the Suuth-west con-acquently the Bible and Tract Societies, as well at the American Sunday School Union find an ample field for their several operations. Large numbers of Bibles and publications of the Tract Society and Sunday School Union are put in circulation here, extending into the new settlements, and reaching thousands who would otherwise be far beyond the sphere of religious truth. Sunday Schools are eing established in the new and remote sottle ments with great success. Over two thousand these nurseries of religion and morals, are not giving impress to the character of the nest generation, and all of them established and supplied with libraries through the unremitting exertions of Re-Mr. Corry, the sociaty's agent for the Soeth-west What a noble work to accomplish in live years, and yet it is but just begun! The Orators of the South.

Mr. Right, in his enlogy of Cathoni, this paints the most jagonfar orator whom Caroline has given to the nation, Hayne.

"Gen. Hayne was the idal of the people, and repaid their devotion by a fidality as time as theirs. He loved South Carolina as the kinght of old his bride. He loved popularity, not for the sake of its slower are carolinens, but because the heart of his the perfection of frank and winning contrest. But the spirit of the soldier radiated from every look and none. In obeying the voice of the State, he hrought to her service a determination to protect her from aggression or invasion, which no terrors could daunt. He stood, the proud delight and confidence of all. His mangural address, on assuming the affice of fovernor, penetrated the souls of all who heard him, and drew tears of kindred sympathy from some of the sternest of us. He was an oraby-ion the full meaning of oratory, the art of persuasion. Free and fast, the words floated on his silvery voice, whilst ingermons and manly candurg axe potency to the arguments of his line intellect. In the merbilian of the pomery and the ambitions imagination of the pomery, entered, with his neural interpolity, into the great scheme, uniting, by true bonds, the South and the West in pomining-tool intercourse. His name would be written in the Alleghanies, and inture generations would bless the wisdom and energy by which this great work was accomplished. But conviction find rim swept over the commercial world. The project failed. His heart sink beneath the galantity. Eager gain carped his galax; joalous unsforting turned upon hum her vold represcribil eye. He died, the noblest victure of those disastrons times.

"High S. begare was a man of too much heart for poinces. His French temperement, quick to resent, yet easy to targive, waring guidens, and confiding, tendered him too unhappy and too disappointed, when tossed or the boistorous and edverse waves of public life. He had abne of that cold patience, or buoyant hope, which often makes disaster the occasion of after rejocing; or deletat the means of awakening new and higher energies. Yet he had a genios capable of mastering every science—an industry which travelled with uniting steps over the whole domain of literature; and a spirit of blazing intensity, which drew to itself und consumed all that was great or truthful or beautiful in the thooghts of other men. How often did his oratory resonad is this hall; filling as with admiration at its pure and deep cadence? Vigorous thought, clothed in the drapery of the warmest and most nervous language, and borne on the wings of a lofty and impetitions applied, characterized his striking powers in debate. Alas! the caghi fell as he revelted the mountain top? "De Quincey how resides at Lasswade, a rounntie-rural village, once the residence of Sir Walter Seatt, about seven miles from Edinbough, Scotland, where an affectionate daughter watches over him, and where he is the wonder of the country people for miles around. They cannot understand why on fair days, id all hours, that little man, with a hown coat, and the woolly bat, is always climbing, hills, and wandering among the shady woods, as if he saught something he could never find. And then, why on cold, bleak, and wet days, he walks along the highway between two piles of siones, transferring them singly from one point to the other. The fact is that the opium which De Quincey coosumed in his younger days is now consuming him; and unless he walks ten miles a day, fair or foul, he cannot secute his maximum of two hours sleep during the night. This exercise he early secures in pleased weather; whea the weather is not so, he transferd his heaps of stones, and makes his ten miles in this way. The Enotien Perrada.—It is a well known fact that the numral tendency, of aristocracies is un did out. But few persons imagine how extremely rapid this extinction is, if left unapposed.—There are at present ubout four hundred peerages in England. Of those, it would be supposed at the first high that half were quite Ricetal, and that not a few of that half renched hack to the Normon eququest. But the fact is, that the oldest peerage is securely as ancient as the reign of Henry be Sevonth—while, of the entire four hundred, two hundred and fifty were conferred during the reign of George the Phird.—Two-thrids of the English nobility, therefore, have obtained their titles since 1760.

We hear a great deel of the ancient lineage, too, of the Branish aristocracy. But the Dukedom of Northumberland, the appanage of the Percies, is now enjuyed by a gentlemm originally of the vulgar hame of Smillson—though he has changed it, to be suic, to that of Percy, having married the herres of that house. The products Dukes of England—such as Bucelength, St. Albans, and others—derive their hunors from their ancestors, who were illegitimate children of Charles the Seroud! A few like the Manquace of Landowne and Normandy, are descended from respectable mechanics—the former from a clother, the latter from Sir Wm. Phippe, of Ibston. The real old Norman ancestry is long since extinct. The Nevalles are no more—they ther with Warwick, the king laker. Sa, too, are the hundred of mailed borons who wring Magna Charles from John.

Hore John P Bigelow, Mayor of Boston-

How John P Bagelow, Mayor of Boston—Sig. The President has had the pleasure to receive yout letter of the 1.0R February, esclosing official copies of the order and resolves lately adopted by the two branches of the Government of the city of Buston.

It allows him great satisfaction to perceive that such measures have been taken by the subhoriles of Boston, as give assurance that no other outrage, similar in that which was, he presumes, the immediate cause of their sdoption, will be permitted to take pitted in your city.

Fram his callicat youth, he has been accustomed to regard with the gentest respect and veneration the city of Boston and the Commanwealth of Massachusetts.

It has been taught to be lieve that their inhabitants were, shoost above all others, the friends of

lie has been laught to believe that their inhabitants-were, shuost abova all nthers, life riends of oider and good gavernment; intelligent enough to apprecially the adventages of free institutions of their own choice, and chanled understanding and resolving that great political probletia, of the compatibility of freedom with order, of liberly distinguished from licentiousness, and of self-gavernment the farthest removed from the dangers of marchy; that they are especially devoted to the usion of the States, and to the Goostitution which established, and still maintains that Union; and that their patriotism would never fail to counsel them to fulfil sill their ohigations under the Coastitution, justly and fully, and in the very spirit in which such obligations were entered into by their renewand ancestors.

Entertaining these seatiments, it was difficult for the President to credit the accounts which were received of the outrage on all law, perpetusted in lloston, on the 15th of February Isst.

That a prisoner, in lawful custody, within the walk of the Court-house, in the centre of the city, and in full sight of the offices of the numerical authorities, liad been, at noonday, forcibly rescurd, by a mob of one or two hundred persons, from the officers of the law, carried out of the building, and through the public streets, in a sort of rumph, and enabled to escape altogether, without an uttempt on the part of any of the suthorities, or any of the citizens, to preserve order and maintain the law, or to parsne and retake the fugitiva, was a statement that seeined to him too improbable to be true.

I was with a feeling of great relief that he received seeh explacations of this atrage occurrence, as showed it in have been an entire surprise upon the citizens, and upon the authorities; an act, of successful temerity on the part of a very inconsiderable number of persons, which only needed to have been apprehended the shortest time beforehand to have been pure entired. The President to the Apprehended from the country,

they regard the law of the land not us a sentimen or an opinion, but as a rule of conduct prescribe

violation.
The President directs me to tender you li thanks for the transmission of the resolutions.

I remain, Mr. Mayor, with great respect,

ORIGIN OF, THE, WORD, DOLLAR.-The Ortion of the More Dollar.—The do-river or suggested for this in Todd's edition of Johnson is condituted by a particular explanation of heer lexicographers. In 1516, a silver inite was discovered at Joachin's that (St. Joachin's Dale) in Bohema, and the proprietors in the fol-lowing yeur issued a great number of silver pieces, of about the volue of the Spanish psoduro, which bore the name of Joachin's thater, subsequently, abhraviated into dollar. Thus the dollar, like the guines, commemorates the placu fram which it was uriginally coined.

It was necessary to put it within reach of supplies; hence it overlooks the valley of the Tennessee River. But for that the Conference boundary, that should have been done directly, which. "A South Alabama Methodist" wants to do indirectly. The establishment would This would have been the better way

If you commit murder, do it quick.
The position of the College is also a hsy have undertaken to do. It is within hirty miles of the place where the Tennesseo, Momphis and Alabama Conferences meet er corner. 2. We already have more Methodist Cellsges than are supported. Randolph-Macon College formerly had the patronage of the Geergia, South and North Carclina, and Virginia Conferences. They are now divided in their support. Virginia and North Carolina stand by Randolph-Macen: the Geergia Confersnee has put up Emery College, and S. Carolina must put up a new one. Now, I must it to any way of sound independent. put it to any man of sound judgement, whather one College, such as those four Conferences might have established, would not have done more for science, fer the education of Methodist children fer the reputation of the Church, thau all three of these Colleges seem at preseat to promise? One Yale College would have been worth them all, and twice as many such, in my opinion.

But I may well concede that two Colleges were needed in that extensive territory-say Randolph-Macon and Emory. I appreciate very highly the be-nevolence and public spirit of the late Rev. Mr. Wofford, and our Scuth Carolius brethren ought to receive his bequest and do what they can with it; but l should have admired his judgement and benevolence and enlarged public spirit faithfulness of t years to come the divided equally between those two Colleges already established and the sellish views in Cokeshum Institution. 3. The third reason why I think the Alabama Conference should not start another College enterprise, at present, is this—it would not be right. This leads to the second question, "Is it honest!"
Let us look at this. I will say nothing ot former ohligations. Two years ago in Greensboro, this question was tho the one great ebject of putting up a College worthy of the name and worthy of the Church? This leads to another nection with LaGrange College. This was done, nobly done—and some \$7,000 were subscribed in a short time to the College, The Conference heartily promised its co-operation and patronage. And if the Conference did not intend to continue its support, it should have said so when it was asked. Nobody could have blamed it then, as the ques tion was put directly and plainly. Au honest answer was asked for, and I believe an honest answer was given. My opinion is clear that the Alabama Conrence cannot give encouragement to these new prejects, consistently, with recently avowed opinions and recently

assumed obligations. At the recent session in Auburn. Prof. Hardy was eucouraged to connect the most distant part of that Conference closely with the College, by selling limited schelarships, for the purpose of paying the debts of the institution. Can it be right to encourage men to bind themselves to patronize an institution fer years, and then as seen as they have done so, break up the iastitution? Nearly \$2,500 have been pledged on this ground, and the persons have relied on the stability of the College and the

### Public Worship-Singing.

The success that attended the two Wesleys is largely due to the fact that they were poets as well as preachers. Their evangelical sermons were not simy preached and left to the fate of hearing—they were embodied in hymns and the people went about singing what they heard. Porhaps, if all their sermons orrespondence were destroyed, a il system of Wesleyan theology could

In this way the saving deetrines of Methodism were fixed upon the minds of all who came within the sound of its melody; and what is more, they were endeared to the imagination and These who could not remember texts, nor feel the force of logica expositions, could repeat verses and be melted by the pathos of sacred music. It is a mean of lasting instruc-tion and of sweet corsussion, an attrac-tion to the place of public worship not easily resisted, and a delightful, soul devating exercise. Bro. McTycre—Many of your road-ors will be interested in the following portions of a letter received from New-York. Bre. At our last session he located to ge to New York, or other ports, to lahor with his ountrymen, largo numbers of whom. coustantly inmigrating to this country.

It will be seen from his letter that he has full employment... May he be the means of turning many to Christ! Yours, &c., I HAMILTON.

I am happy to inform you that by the help and merey of God, I arrived at this place on the 11th instant, after a voyage of seventeen days. We had very boisterous weather, and I was sea-sick most all the time; but we encountered no dis-aster. I was kindly received by Bro. Hedstrom and family, as well as by the brothron and sisters in the Bethel ship. I had informed them when I left Mobile, and they, good people, had been praying for me all the time. I have been intro-duced to many of the Methodist minis-ters in this place, especially to the lead-ing men, who all received me with great ndness, for which I thank the Lord, because I feel it is all through His morey.

I have been very busy since I came here, in translating letters and tracts, and in preaching and leading prayor and class meetings.

We have a very interesting work in
the Bethel ship. On the Sabbath we
have Sunday School at nine o'clock, in which the Swedish culturen are learning English—preaching at ten c'clock in Swedish—Sunday School again at two Swedish—Sunday School again at two o clock, preaching at three and seven o'clock, P. M., in English; Monday, Swedish prayer meeting; Tuesday, English prayer meeting; Wednesday, Bible class; Thursday, English prayer meeting; Friday, Swedish prayer meeting; Onr congregations are very largo, consisting of Swedes, Danes, Norwegians and others. We liave experienced God's prosence—several souls have obtained preace, and the work is going on most prease, and the work is going on most gloriously. Thanks be to the good Lord! Bro. Hedstrem is a working man, sanctified, strong in the Lerd, and of great courage, and an old fashioned Me

There has been a glorious revival in several Churches of this city. In Nor-folk Street Church there was one hun-

The letter is dated so far back, and details so many interesting things in relation to the early efforts of the writer to introduce Methodism into "Or" leans Territory," as it was then called, that I think it cannot fail to interest your readers in that quarter. To me it was a real treat; for, having been over much of the ground described, lately, myself, I could follow him to most of the places, and mark the changes time has wrought. I ought to add that the writer, after seeing much toil and many privations in the "travelling connection," returned to Kentucky and located near Irvin, in Estill county, where he lived for many years respected and beloved, and where he recently died in the faith which he laboured so hard to preach to the early American settlers of

### For the New Orleans Christian Advocate. Unparalleled Desecration of the House of God!

The newspapars say that the Mathodists of Na oma of us, that men might easily loose all spiritual or religious regard for God or his worship; but then, there is a sort of church pride, when religious principle is totally wanting, that usually prompts with the ruling authorities of the Methodist Church at Natchez, is surprising in the last degree.

Well, well! To what are we coming? Methodist Church in Natohez, hired out for a heutre!!! Whore was Dr. Tooley? and where was Ben Walker? alas, alas! Their voices are ushed in the grave. I should have fancied that their insulted spirits would have domanded that the bload foot of desecration should desire from tracipling around the holy ultar of their wonled worship. The April number is before us, which we regard volumes. The high expectations formed by Dr. Doggett's appointment to the Editorship were not extravagant. In addition to himself-always on hand as en elegant and ready writer he ha already organized en able corps of contributors.
We hope our Quarterly will not change hands but he pushed forward to the undisputed comparative merit it ought to have, and the circulation it then would have.

### Thoughts on Travel.

One generation passeth away, and anothe meth. But how varied are the condition and aspect of the one from the other. Thirty years go, and how little nur fathers knew of the facili es and comforts of traveling, which distinguish thinge and nation. To day, one may be in the iolding the land of the Pifgrims—the monments of olden times—the elaborate and compli ated systems of commercial and manninguring life-hill and plain and valley, richly cultivated, everywhere dotted with town and city, and sur-consided by opulence and refugement; to morrow may be in the far west, among the proneers, viewing rural access of rude, harrly from the meaning, the stirring elements of enterprise—renewing, transforming character and destiny. The Coppets Place, on the Guadalupe, on the night of day following, he may be in the North, hattling for the State with inclement which and viewing rural scenes of rude, harrly frontier lite weather, chilled with front and covered by the lows of winter; "the day after, he is in the sunny South, breathing balany air, luxurlating amid the association senerous bloom of nature, and reposing under the tear had bade of beautiful foliage and fragrant flowers. trous bloom of nature, and reposing under the

The quantity of enton diready arrived in mar-ket this year, is greater, as we see by the same journal, than last year, by 136,000 bules, while the domestic consumption of the year is estimated a 150,000 bales less, although last year had fallen considerably below the previous one. Adding these two quantiles together, we have 289 000 ad-ditional bales for which a market must be sought in Europe; and if in this we add the diminution of the previous year, we shall have a total of little store to 350,000 bales additional; and hance the fall it price.

It appears that it bees me necessary to have a large cake of ies ent away, which extended ever the swift current of the river, end whish, was coasiderably above the surface, of the water. Finding none of the men willing to venture out in the ice, Judge P. took an are and went upen it himself, and consmenced eattieg the ice, when the cake fell into the weter said he ipposit. The eake floated dewn with him upon it among the rocks of the rapids, when it broke. He was precipilated into the water, and floated down to the edge of the ice below the rapids and struggled some time to get nut-upon the ice. In the ulean time, two men sawem in to try in save him; but he was finally carried under the ice and drowned. When found his cravet was found to be very tight, and some think that he was strangled by his cravat, which was ecatracted hy being wat. Thet, howsver, is not very probeble.

Minut's Lador-Light-house.—The following facts, gathered from one of the assistont keepers of the Light-house on Minot's Ledge, have a thrilling interest. It is well known that this light is constructed with a light fron frame, the posts being set in the ruck, drilled for that purpose, at low water—the ledge being three miles distant from the shore. The late storm commenced on Sunday morning about 2 o'clock, the wind blowing from the northeast, accompanied with heavy snow, and preventing objects at a distance of half of mile from being seen. During the day the atorm increased, and on Monday morning the oscillation of the Light-house herames or great-from the netion of the sea, that the inmates could with difficulty keep upon their feet, and, indeed; were frequently knocked down. They were finally obliged in retreat to the store room, the next below, their cooking utensils having been broken, and it being impossible to remain, where they were. Here they remained for four days, without sheep, and seem sented to live upon dry brend and uncooked meat. The chimneys in the light were continually heing thrown out, and of course broken, and the difficulty of ascending to replace them may be inferred from the fact that the person who was compelled to perform this hozardous duty, was several times thrown from the ladder in consequence of the vibration of the building, caused by the storm. The spray ascended to the receiving deck, a distunce of some fifty feet, anisthoroxighty soaked the provisions and every thing contained in that distributed to some first the torm abated, and the wind changing to be north, broke the storm that would have discouraged most men.

THE NEW APPRAISMENT LAW.—We have already stated, on the authority of the telegraph, that the Seoretary of the Treasury, has construed the new appraisement law so as to exclude fraights from the valuation of imported metohandies. This decision is in occordance with the construction given to the acts of '42 and '46, the wording at which was precisely aimitar. It also is in secondance with the Constitution, which provides that all dulies, hoposis, and exoises shall be mufform throughout the United Stätes, it being obvious that if freight is included unnong the coats and charges, there will be a great difference in the duitable basis there will be a great difference in the dutable basis at different ports. It is well known, too, that the rates of freight from Europe very eyes to the same ports, depending on a variety of causes. Steam ships, packet ships, and first class vessels, always command higher rates of freight than their slower competitors. Had a 'duty' been charged rupos freight, therefore, the effect would have been injurious to the interests of, these vessels. It would have offered a premium to ill magnet and slow yessels, which could be sailed chasply, thus being anabled to take freight upon low terms.

These facts were undoubtedly taken into consideration by the Secretary of the Treasury in making up his decision, and, although a different construction of the new act would have siforded substantial relief to the iron and coal interests, he has syidently decided in accordance with his convictions of duty. vill be a great difference in the dutiable ha

A Long Passage.—The ship Warren, Captain Lawton, which arrived on Wednesday night, has been one hundred and seven days oo her passage hither from Glasgow. She bad sixty passengers, who have all, atrange to say, been in good health during the whole passage. The versel experienced violent gales, from the 12th of December to the 7th of January, in which she onshipped her rudder and sprung a leak. From the 6th to the 22d of January, she floated about at the mercy of winds and waves, without n rudder. The crew finally succeeded in constructing a rudder out of a hemp cable, which enabled them to direct the movements of the ship. Fortunately they fell in with several vessels, which sopplied them with provisions, and enabled them to reach port in safety. [New York tipbe, 28th ult.]

Bibles of Lading.—A case which occurred in the Court of Common Pleas regarding a liability on a bill of lading, coils for the attention of the mercantile public. The question was whether a bill of lading givan by the master of a ship for goods which he had never received on board, could be held to bind his employers. The Coort decided to the contrary. The very nature of 0 bill of lading, it was affirmed, showed that it ought not to be signed till the goods were on board, and the only remedy for the consignee, therofore, was an action against the Captain for fraud. A bill of lading, under such circumstances, would consequently be as valuciess os a forged bill of exchange, and as the accurity of persons receiving these documents is thus made contingent opps the honesty of the master, irrespective of the character of the owners, et is a point that should not be overlooked. MUSIC BOOK, "THE AMERICAN VOCALIST."

AY SEV. D. II. MANOFIELS. This book, published a few mouth since, I

and a most rapid sals, nearly 30,000 copies having already been printed. It is divided into Three Parts, all of which are embraced in a single ulted for the Church, the Parlor. Part One,
Consists of Church Music, old and new, and
contains the most valuable productions of eminent American, as well as European composers, pas

and present, in all, 330 church tunes, adapted to every variety of nieter found in the hymn books used by all the religious denominations, besides a large number of Anthems and select pieces for special occasions Parts Two and Three,

Contain all that is valuable of the Vestry Music now in existence, including the most popular Royi val Melodies, and the most admired English, Irish, Spanish and Italian Songs; with appropriate Sacred octry, embracing in a single volume-600-tune depted to every occasion of public and social worship, and containing all the gems of music tha have been composed in the last live hundred years. The whole designed as a standard in every depart. ment of sacred harmony.

The poetry alone would fill a large volume,

whole hymn being set to a luns, instead of a cingle verse. The Publishers have received, unsolicited,

large number of recommendations of this book, u few only of which are annexed: [From Rev. J. C. Aspewash, Presidua Ehter, Spriogisia District, Vermont Conference.] District, Vermont Conference.]

"It is my opinion that the 'American Vocalist' is decidedly the best Tune Book ever used in New England since my remembrance. It has, in every instance, given excellent satisfaction, both to singers and conference man to the conference of the trues as the would anoth acquaintonce and friend, after an absence of thirty years, and the attention of the young is arrested by their grandeur and hevely. I shall introduce it throughout the District."

[From N. Perio, J., Cambridgs, Mass.]

"Phia-book calls up pleasant memories." It contains a bettor selection of good tunes, both for public and acciai-worshlp; than, any other collection I, have ever met with. Though an entire stranger to the author, i feel grateful to him; and desire thus publicly to thank him for the important service he has rendered the cause of Sacred Muslo."

"Much of the Vestry Music is entirely new to me, and exceedingly rich. On a single opening in the second partor the book, I have found on the two pages defore me more true, heart-subduing barmony, than it has been my fortuna to find in some whole collections that have made quite a noise in the world."

"We have been there are the second constants."

"We have been there are the second constants."

We have heretofore noticed it with emphatic approval. It is one of the best combinations of old part they make we have seen. The division into different departments is a new and happy idea. The great characteristic of this collection is, that whils it is suffinently scientific, it is full or the soul. Of forelax music."

(From the Guids to Holdres, by Ray, D. B. Kiog, Roston.)

"This work has elicited annot attention for a few mornts past. Any one who wishes to become acquainted with the whole range of Savred Music, in all its varieties, may now have an opportunity.

I will suppose a oase, in regard to the "Advocate," who knews me, can bear witacss that I am net partial to the pecaliar dootrines of John Wesley. I nd-mire the zeal of that "man of Ged" lisuntiring persoverance—and the self-desial and self-sacrifice which marked his brilliant career. I can honor his memory; and can love his followers; as fellow-members of the Church of Christ without adepting his logic or his meta-physics; and, if that good and meck mea word en earth new, I de not believe he would "Bull" or bully me out of the pale of the Church, for oneying the dietates of my own private judgment. ### Methodist Class Meetings.

A stated assemblage of Christians for the express purpose of communion with God and with each other, even mere intimate and strict than is a second and strict than it was a second and strict than the second and strict than it was a second and strict than the seco worship, canuet fail, in the very conception of the purpose, to-produce a-happy effect upon Christian experience. The epportunities for religious worship and exercise which they afford, make an iuportunt addition to the means of grace. The spags of praise, the many prayers, the words of exhortation, the outgushings of the deep feelings of the heart, cannot fail, in the very exercise they involve to scenre the blessings of God, and to improve the life. But there are eure, which, which these meetings se-guishing characteristics, demonstrate in the clearest light their usefulness.

It is a peculiar feature of these meet ings, that each member shall make, in the presence of his class, an honest and candid statement of his Christian feelings and purposes, his triumphs and his difficulties, his joys and sorrows; indeed of every thing necessary to couvey a correct conception of his religious condition and prospects. It is evident, therefore, that they make necessary self-exumination, and the use of the means for the attainment of self-knowledge. They may be regarded, indeed, in the They may be regarded, indeed, in the light of an agency, ramifying the whole membership of the Churck, whose office it is to incite the whole membership in dividually to an acquiantaneeship with self, and whose effect it is to widen the self, and who early the self, and who early the self, and who early the self all, subdaing the self all, subdaing.

When it is remembered how essential is this know ledge to guard against error and temptation, to the proper furniture of the heart with the means of progress, to the re alization of the comforts and bopes of religion, indeed to the maintenauce of religion itself; and when, at the same time, the peculiar hability of the Ohristian to self-delusion and the neglect of this knowledge is properly apprehended, the great importance of an agency whose direct effect is, throughout all the Church, to increase and maintain in-oreasingly this knewledge, must be ap-

AN. EVIDENCE OF ILL-BREEDING. There is no greater breach of good manners—or, rather, ne better evidence of ill-breeding—than that of interrupting another in conversation, while speaking other has fully closed. No well-bred person ever does it, or continues a conversation leng with one who does. The latter often finds an interesting conversation abruptly walved, closed or declined, by the former, without even suspecting the cause. It is a criterion which never fails to show the breeding of the individual. which never fails to show the breeding of the individual. A well-bred person will not interrupt one who is in all respects his interior. If you wish to judge the good breeding of a person with whom you are but slightly acquainted, mark such a person strictly in this respect, and yen will assuredly not be deceived. Hewever intelligent, fluent, assured or even graveful a person sure. easy, or even graceful, a person may appear for a short time, if you find such individual guilty of this practice, you will find him or her soon prove unintersesting, insipid and coarse. It is one of the surest and mest infallible tests over she surest and most infallible tests over applied for any purpose whatever. It is often amusing to see persoas priding themselves on the gentility of their mannors, and putting forth ne little effort to appear to advantage in many other respects, so readily betray all in this particular.

VIRTUE'S VICTIMS.-We think it is Rochefoucauld who says: "Some people are disgusting with great merit; others with great faults, are very pleasing that it looks almost like a folly to put it upon paper; it is so constantly thrust in your face that you fauey all the world west know it. But all the week! Jeeps must know it: But all the world dees net know it, or it would ne longer be true. There would be a change at ence. Merit would borrew the gracefulness of folly, and vice, lesing its mask, appear in its untive deformity. Moralists per-petually preach virtue to the world, in words, as the leveliest things, and make it, in their actions, the most disagree-able; and these meritorious folks who are ferever railing at fashion as frivoleus, and society as caroless of every thing good, are the ones who help to make them so by stripping the angel virtue of her wings, and turning her into a cen-sorious lady of an uncertain age, with a meral tract iu eno hand, and a list of

The Publishing Committees of the Louisiana and Alabama Conferences will bear in mind their annual meeting, at the office of the Advocate, on first Monday in May.

To AGENTS A few have sent u funds by drafts on commission morchants of this city. We recommend this mode when convenient to our agents, of remitting funds, as commisslon merchants are generally very accommodating. We present to the agents thanks for what they have done for the New Orleans Christian Advocate by their mergy in securing cash subscribers; and their promptness in remitting names and money, and we hope they will creat of the Mississippi Conference writes us that he has fixed one HUNDRED sash subscribers as his portion for this year; and from his success thus far, he will doubtless succeed. ## Sunday Schools—April and May Collections.

We call the attention of the Alabam Conference to the following resolution passed at their last session: It is impertant. The opportunity presented in having the benefit of the taste and judgment of such an editor as De Summer in getting up a Sunday School Library, be well improved. He has alstand in need of a Sunday School liter ture of our own. Our Sunday Schools liged to use books that would not be used were proper ones to be had. The theology of Southern Methodism es its Sunday Schools to be furnished with books unlike those offered so pressingly by the American Sunday School Union. Many of them, however are consenting to be supplied with its issues because they must use these er

The editor is already ongaged in preparing works for the press, and the mgent is proceeding to publish on the assurance that the expenses incurred will be met by the Church. Resolutions sometimes mean nothing. But such as the following are not of that sort. They have almost the nature of promissory notes falling due at a fixed time. The agent and editor have so taken them, and ventured upon them. We hope they to this subject. The season should not be allowed to pass, for soon other collogtions will press their claims. But here is the resolution alluded to:

### Book Depository in New-Orleans.

Several of the Southern Conference have expressed a desire, and by resolu tion have made request, to have our Sunday School books and other publications deposited in Now Orleans. We have been inquired of by letters from Alabama, Mississippi, Louisiana, Arkansa aud Texas, whether they can be had here, and orders for their filled. The need is greatly felt, and we would most respectfully and earnestly invoke the attention of our worthy book agent, Dr. Early, to the matter.

Arrangements for supplying a market of our publications hero could easily and readily be made, and in view of the urgent and large demand for such acomodation it is surprising that it has so long been delayed. Thousands of copies in the catalogue of the agent's publications would find circulation were they placed within the reach of purchasers We stretch out our hands to the agent and ask him to give us of his broad.

BATON ROUGE-Rev. R. J. Harp. preacher in charge of this station, closes a letter of business, dated 10th instant, with the following note: "Wo have reocived forty five members into the church on probation, since we commenced late series of protracted religious ser vices here; the Lord has converted or reclaimed the most of thom. I hope we will soon have a revival."

Public Worship-Prayer.

This is the kimage and superscrip tion," upon every service which marks its sacred character. Parodi may sing the mere orator may discourse eloquently on divine themes, the practised clerk may read the lessens well, but the man of God prays. His motto is, "Pray without coadne.

The parts of prayer - deprecation petition, intercession and thanksgiving Ho that leads a congregation, in their address to the throne of heavenly grace. according to this prescription may some times weary those knees that are not used to bowling, and those hearts that have no interest in the matter, even though he be not guilty of vain repetitions. Many never appreciate their sinfulness, the extent of their wants, the multitude of blessings for which they should be thankful, until their case in made out for thom. They need to be led to the meroy seat, which is some thing more than being told the way

The discipline asks, "Do you use each of these parts of prayer?" Shall we use petition and not thanksgiving-this i show curselves craving but ungrate ful. The worst of sinners are so. Shall we give thanks without deprecation and intercession-the parable of the complacent l'harisee, who had nething to ask for, not even mercy, reproves us. is observable of mere formalists that in their prayors they are given to pious exclamations, saying fine things of God-His majesty, might and goodness-and making pitiful laments over their own weskness and helplessness, but no recog nition of the claims of dlvino justice against thom escapes their lips, no censciousness that they are sinful as well as weak croatures appears in their de-

We "the promised grace" upon all, then and there, should prayer be made in the congrogation-that grace without which all worship is doad and cold and profitless.

Wo admire his piety who said, "If I get to Church too late for the first prayer, the sermon does me little or no

Promeditation for public prayer is commonded upon the same or higher grounds, as premeditation for preaching. As for deriving help from the Spirit he derives least in both instances who malies the loast preparation. Your inspiration preacher, coming to the place and hour without knowing what he has to say, is so busied, confused and distract ed, easting about for plans tovts and thoughts-matters that can no longer be put off-that he is not in a situation to loar what the Spirit will say to him; whoreas, he who has done his work be fore-hand, oan composedly and confidently look up to God for his blessing

npon it, and receives it too. The patriarchs and prophets first piled up their altars, flayed their sacrifices, and spread them out in order before Jehovah, then prayed for his consuming fire to be sent down. They provided the flesh and God the flame.

A word more on this subject eminont minister has said, "When I will be redeemed—fully and promptly can preach I can do my praying also: redeemed. The attention of all the I can even pray when not able to reach " The minister needs the prove he makes as well as his congregationand comes, we think, with rather a poor grace to preach to those with whom he has not prayed. Some nice and dainty ones in voice habitually put forward substitutes, and do this common work by proxy-saying themselves from the prefatory drudgory!

This is not quite so bad as the course taken by the elorical gentleman, who on entering his pulpit remarked, "As we have a full and important subject to investigate this morning, we will omit the uther services and proceed at once to the subject :" or, that Methodist minister in a neighboring State, who coolly told his patient and waiting hearers, at the conclusion of a sermon, that " having fatigued himself in pursuing the dis course, he would dispense with the prayer," and sent them away with a hasty benediction. The first is as if the high-priest of the Old Testament had come forth to bless the people, having omitted to sprinklo the sacrificial blood about the holy place; and the second goes upon the presumption that l'aul's planting oan do without God's increase.

the "New-Orleans Christian Advocato" the inquiry is made, "I low is it?" This is a question called out by the astonishing lact set forth by the worthy Secretary of the Alabama Conference, that notwithstanding the extensive revivals which prevailed in many portions of the Conereuce last year, yet the figures show an actual decrease in the close of the year of thirty one members—" How is it?" As Bro. Dorman made reference to the discontinuance of one of our colored missions as an apology for the loss in members, and as that mission had its being in and about the work upon which I am laboring the present year, I have thought best to examine into the facts in the case and report accordingly.

the old mission book, and after a care ful examination into the members roported from the Macon Circuit and others, I find that there still romains eighty-oue members which were not re ported by any one last yoar. you please, Mr. Editor,) I will allude to

another fact in justice to the Alabama Conference. In looking over the mein hers reported at the last Conference, think from the Warsaw Circuit, the mun er was one hundred and ten, (if I am me.) and the Church book on the Cir mit shows two hundred and twelve mem ors in standing, and all under the pas-oral care of Bro T. Moody. And now if I am not wrong—and in this I may be, out in that I knew that I am not-you may without nucle effort see how it is Thus, one linndred and two on the Waraw Circuit added to the eighty-one on the colored mission gives us one hundred and eighty three, from which we take the thirty one deficit as reported and it leaves us an increase of one hundred and lifty two in number last year. EXHORTERS. -These are a class of officials very useful in Methodist economy and a place is provided for them. Un fortunately, they seem to be dying out.
They have not the honor nor numerical strength among us they once had. This Christian of all work, this minute man. carnest and zealous, leading meetings of prayer, and applying, by offhand renarks, the more claberate sermon, stirring up the church in his own free man-

ner, desultory by rule, and ranging, without the limit of a text, the whole field of Christian duty-the exhorter is disappearing ! What has become of this worthy chareter of old times, for he is missing?-

Alas, he has fullen out with his calling. Ho and his immediate friends have conoluded that for a talk of any kind he must have a subject, and a subject can bo nothing less than a text, taken in so many words from the bible, and every at implies a preacher, and therefore he must either quit exhorting or go to

oreaching. And now ho is a preacher, regularly made by Quarterly Conferenco action. What further? That which was vory

good whon the exherter said it, does not porrespond to the higher pretensions of the pulpit. The good exhortation is a a poor sermon. Less, is accomplished, the sacred office is cumbered, and brought into disrepute. The ministry is blamed, and the church is not edified.

Improvement took the direction of stless development, and the first-rate xhorter has developed into the tenth rato preachor. A lirst-rate exhorter, having his own

and his friends' consent to continue so. is hard to find, now-a-days. Doctors of Divinity are not so some Quarterly conterences are chargeable with this lamentable deficioney. At their door this evil rests, and without fear or favor they should look to it.

TETTER IV.

Left London for Paris-Country from London to Dover—Taken for a Span-iard—In the Wrong Car—Politwal Discussion-Arrival at Paris-Exvense of Living, etc.

I found it necessary to make my stay in London as short as possible—in view of the heavy expense of Medical lectures and Hospital visitation—I know that bo obtained in this place at an inconsid erable cost. Accordingly I left London for this

place, on the 13th, by way of Dover, Calais, etc., and shall reserve any thing ou may have expected about the great emporium of Her Majesty until May at which time I expect to visit the English capital, and will report sights: etc

The country from London to Dover is said to be the garden spot of England. it is certainly in a very high state of cultivation; yet, the season of the year in which I looked at it was most unfa vorable for attraction. The hodges, about which travellers have been so abundant of praise, were leafless and dry. The unbroken continuity of thom would destroy much of their beauty with me, even were they dressed out in their loveliest attiro of "russet and green." On my arrival at Dover, there was

some difficulty in determing my fationality. I was first taken for a Spuniard and addressed in that language. . My interlocutor finding himself wide of the mark, made a second advance in French but found out his mistako when I replied in English. - After getting on board the teamer that was to take me across the channel, I addressed every man I saw in English, but got for answers an invariahly—"No, Monsieur;" I assure you, the feels something of solitude, when placed among a throng of human beings, in form and stature like himself, but of whose incessant bable of speech he knows just nothing at all.

About ten o'clock I took my seat in the cars, bound as I supposed for Paris; but while listening to a barbarous mutiation of my nativo tonguo, between I charitably and in respect for virtue, mentally adjudged him, I found out that I was in the "wrong box," which error remodied as soon as I could, and just in time, too, to save myself from a mistake that would have cost me a serious jaunt. After getting under way, I bocame an interested spectator—I will not say listoner—of a most lively discussion on politics, between a Frenchwoman and several gentlomen. . She could speak a she was counsel for the former. Being ignorant of the language, I could not keep the "thread" of their discourse; yet, the alternate earnest and piquant tones of her voice, hor animated mauner, and rapid gesticulation, mingled with and rapid gesticulation, mingled with hursts of laughter and applause from her untagonists, afforded me no little unuso-

We arrived at Paris that evening at eight o'clock, and after undergoing an examination of trunks, etc.—the fifth, I bolieve, since leaving America took lodgings in the Hotel des Empires.

Next day I called on my old acquainanco, Mr. Hurtel, of whom you have heard me make mention, perhaps, and although not intimately known to me, it was like meeting a friend of long asso-ciation—so solitary did I feel amid that vast hive of unknown persons, and that Babel of (to me) meaningless sound.

My stay in Paris has not been long onough to justify me in an attempt to introduce you to its wonders. Besides, my ignorance of the language is a great lrawbaok, both to my enjoyment and my nterest-us a correspondent. This; by the aid of a good teacher and personal

In the notice I design to take of Bro. Crouch's communication, I propose to republish every para graph, by number, that has any essen tial bearing upon the subject, and then add my comments to each, leaving the Methodist people to judge whether the

2. " And to reach this end by the cu ployment of such means, methods, and instrumentalities, as the openings of Providence, from time to time may sug gest, and the word of God approve; o not disapprove."

Now what did the chary advocate mean by this paragraph, in immediate connection with the foregoing? he mean to affirm that pewed churche are a part of those "means, method; and instrumentalities" which the open ings of Providence have employed from time to time, and are now employing for reaching the coul of "doing the greatest possible amount of good to men, by bringing them directly under the influence of the gospel"? Was he afraid to make this avowal to a Methodist people? That such was his intention we are warfanted in concluding; and especially so from the lagbling field approved; or not disprove." (The italies are my own.) The last sentence in this las line, exhibits the only argument the writer adduces to prove that the word ef God sanctions the course he advocates, and that is, it "does not disap prove" pewed churches; and supposing that this is the only, or at any rate the strongest argument he has, I suppose it will become the watchword of his party

in the coming struggle.

SIR JOHN FRASELIN .- Another expedition i about to be fitted out in England, to search for Sir John Franklin and those who arcompanied him bin we greatly fear that there is little chance that any explaration will be successful. IDmrauity however, requires that offerts shall be continued a long as any hope remains; of discovering the last unvigators. The American expedition will find them, if they be alive, and in a position to be reached by courage and daring enterprise; but it is to be apprehended that the vessel commanded by Sir John Franklin hits been destroyed among the teebergs, and the officers and crew lost? afive and detained by ice in any of the various in-lets at the North, it is surprising that an intelli-gence of the fact should have been received from

y of the natives.

The new expedition is to consist of a small eves se, the Prince Albert, (lately engaged in the search,) under command of Capt. Kennedy, of the United States, said to be peculiarly well qualified for the undertaking; and it is designed to make extensive juland excursions, when the vessel shall be laid up for the winter. It would be particularly grantying to have Sir John Franklin and his campanitus rescued through the agency of Ameri caus—though we think that there is little prospec that it can be done by any one.

parabola: his thought went over the heads of his mannedate heaters, and struck upon the ears of other generations. But, an, the Press arrests such thoughts in their transit, preserves them, from neglect and sends them on their course. The truth which is spoken to-day in the American Congress or the British Parliament, in the scientific betureroun or in the charch, to marrow is projected, like leaven min the mass, and as drawing towards identified conclusions individuals who are na wide sport as the joles. It or not easy, then, to estimate the impetus given to modern civilization by this centralizing influence of the Press creating a republic of reason, a commonwealth of ideas.

True, ar, the influence of the Press is not allinous direction. It exerts a force for evil as well as for good. But what then? We must look to the Press to correct its own exil. What are we going to do with an engine that shoots out twenty-live llouisand rays of the Sau in an hoot? We can only rejoice that it is a self-rectifying power. If it upons the floud gates of error and heentimasness, it also sends forth the agencies by which these can be staniched and crushed. If it evokes a badesport, it likewise furnishes the polent grorician; and in estimating the enin total of its influence upon civilization, there can be but little doubt as to its beneficial tendency. It is the agentic features with the ripest results of thought and time, It is the aentimed of freedow—the great democration pleaning the keys of knowledge into the histiy of the Press, we nerceive that it is the organ of the people. It is the Hellesport which desputs have vanily endeavored to chain. This is evident, too, when we consider who have been airsed up with that struggle, and what their sympathies were—Milton, Pym, Deloe, Benjamin Franklin, James Oris, and Samuel Adains. Another Press, we have been airsed up with that struggle, and what their sympathies were—Milton, Pym, Deloe, Benjamin Franklin, James Oris, and Samuel Adains. The examination into the case of the fugitive ave Simust, was continued this morning before

the Commissioner.

The captain, male and a sailor, of the brig M.
At J. C. Hillmore, were examined, and, testified that they left Savannah, for Boston, on the 24d of February; that they saw Simms on the wharf at Savannah, a few days before sailing.

That he saked the cook for a situation, and was refused. When off Besson light, the prisonor was found by the aste, hid in the foregastle; that he was confined in the vessel by the captain while la the harbot, but managed to escape on shore at South Beston, by forcing the look of the cobin and stealing the brig's boat.

That he told them he came on board the brig of Savannah the alight before they, sailed, This closed the evidence for the claimant. Counsel for the defence then announced that they had no evidence to effer. An affiliavit of the figitive was bead, stating that his freedom was purchased by his father when he was five moaths old.

That his free papers are now in the possession of Morris Potter, of Savannah, and that he dealers delay to abtain them—that he never heard of James Potter, his alleged master, until yestorday morning. We gottee was taken of the papors.

Mr. Rantoal then anneunced that he designed to argue the constitutionality of the law, as to thright of a Commissioner mist upon the case—this by Jury, etc., and asked a postponement natilithus and the control of the country of the law, as to the control of the country of the law, as to the fight of a Commissioner of the upon the case—this by Jury, etc., and asked a postponement natilithus and the control of the country of the law, as to the control of the country of the law, as to the control of the country of the law, as to the control of the country of the law, as to the control of the country of the law, as to the control of the country of the law, as to the control of the country of the law, as to the control of the country of the law, as to the control of the law, as to the control of the country of the law, as to the control of the law of the control of the law of the country of the law o

SPONTANEOUS COMBUSTION.—Fortunate Escape.—We have been furnished with the following facts: The carelessuess of shippers in mit uccurately describing their goods, often causes much amnoyance and not unfrequently serious accidents. One of the most providential escapes that we have ever witnessed occurred on Sounday last in this place. A house in New York had shipped on loard the achooner Empire, Capt. Bunker, a hox of all clothing, to Mr. John Tatsapaugh, which the bill of lading described, as aerchandise. It rus consequently stowed in the hold, ond upon the top were placed seventeen keys of powder, and around, some three hundred more. The Empire cloared at New York, ou Monday, afterndou, last inst, and arrived at this port on Friday, making the passage in live days. Upon opening the hox, it was found that the clothing was completely charred through, and the hox nuch, scorched by spontaneous combustion. Had the box recanined in the hold a few hours longer, it is probable that u fearful explosion would have been the consequence. [Alox. Guz. SPONTANEOUS COMBUSTION .- Fortunate Es RIVERS OF ALABAMA. - Professor Thomey, tr Thyras by Alabama.—Printessor Thomey, in, an able report to tovering Collier on improvements in the Illack Wurrior, makes some interesting remarks as to the general character of the rivers of this State. He says: The rivers of the State preson a highly interesting and important feature in its physical geography. The Cobsequence in the physical geography. The Cobsequence in mineral wealth, enters the Alabama, which intersects an agricultural district of almost uncipitalled fertility. The Warnor drains the conflicted of the State, and falls into the Tombeckbee at Denopolis. The Tombeckbee and Alabama, convegs in a remarkable manner toward the lifead of the Mohle Roy, through which they enters the Gulf of Mexico.

of the Mobile Rey, through which they enter the Gulf of Mexico.

The Alabama is navigable to Wetnapka; a distance from Mobile Hay, by the windings of the diver, of 376 nales; and the Warrier, for more har half the year, is navigable in Tuccalosa, a distance of 855 miles. The Tomorekhag, is navigable to Abest on the Michile Welley of the Streams is due, in a great measure, to what at first sight appears a defect—their tornous meanulerings which, whilst they increase the length of the rivers, diminish their velocity.

The population of Alabama manst greatly increase before these streams can be entirely superseded by modern means of transpartation, and hence their unprovement must be a subject, of interest to those Win keep the progress of the State matiew. [Mobile Register.]

DESPAIR THE FASILION FOR LATILEO. Amedre Achald, the piquant correspondent of the Etats Class, prefaces one of his fetters with the announcement that it is the "rage," for ladies in Paris, just now, to wear the manner and nir of the profoundest mejanchely. Like all fashions, of course, it is best suited to certain physiquomiles, and blomles are found to be delicious with m tope left-interly disconsolate. A great writer has said, "Despair is into one step before consolution," however, so the gentlemen-provide, ms. befure, for such matters as the ladies only. "Dat in particular expression of foce, should be the fashion, is one of the novelties of these electric times, but so it is. It is odd how few of the fashionable women do it well, however. A profound-coquette is the only one who can succeed at it. The muscles of the face get fatigued, and the turned down curners of the month become suff, with several hours of abanitigated dejection. The charm of it is the relief of laying it off with bruceless and carings; and husbands, profit by the fashion—the charge which repose requires, on getting home, being from moping to smiles, not from statles to moping. Fire Hands.—We do not know a corporeal distinction which the exculaite cavers more than a small white hand, a meraber which will fit ensity into a indy's gluye, and may be exhibited upon a snow, cambric handle-refuief, without its color suffering by the coatrast. To many, as well as to the into hot of Byron, such a hand is a distinctive mark of "gentle," or, as we should rather, say, "genteel" blood. We confess that this, is a feeling with which we have never sympethized. The bronze famil, with his power of muscle and his welling veine, is to us a firm nore gratifying object, for it hells of evention, and society holds one civilization by his sudworth grasp far more securely than the most arbitration fingers would enable us to do. We are all she andre inchiped to preserve this beeling, after reading a paper contributed by Mr. Wilson to the littich Association, upon the method by the stage of the Birtish Isles. Thin gentleman stased that from the examination of the sword-hills of those warrior luminers of old, it was evident that they must have had safid hunds—mich smaller than the men of the present day. They stood looking at the splendid shaft, when the Yankee said, "This is the place where Warrea fell." "Ah!" replied the Englishman, evidently not posted up in locel historical matters; "Did it hurt him much?"
The native looked at him with the expression of fourteen Fourth of Julys in his countenance: "Hurt him!" said he, "ho was killed, sir!" A. Graye without a Monument.—The publish of cemeteries is the ocean. Its poetry is and in shuman language ever will be movinten. Its elementa of sublimity are subject of feeling, not description. Its records, like the reflection universe of the interpretation of the waveless boson, cannot be transferred to paper. Its vestness, its eternal heavings, its majestic music, in a storm, and its perils, are things which I had cadeavored a thousand times to conceive; but until I was on its mighty boson; looking out upog its moving mountain waves, feeling that eternity was distant from me the thickness of a single plank, I had lyied in vain to feel and know the glories and grandeur of the sea. I there first felt what John of Patmos meant when he said of heaven: "There shall be no mine sea." Bet there is one element of moral sublimity which inpressed my mind, and which I should he pleased if I could fransfer in all its vividness tu the mind of your readers. The sea is the largest of centeries, shall its slumberers sleep without a monument. All other grave-yards, is all lands, show soine symbol of distinction between the great and the small, the rich and the poor; but; in thet ocean, centelery the king and the clown, the prince and the passant, are alike undistinguished. The same issue rolls over all—the same requiem, by the ministreley of the ocean, is sing to their honor. Over their remains the same storm beate, and the same sun shines; and there, namarked, the weak and the powerful, the pluned and the unbionored, will sleep for until awakened by the same-trump the sea will give up its dead. He stood amid an angions through
His brow was pute and hight
And metancholy was the light
Of his dark searching eye—
A trendbing smile was on his lip,
A such of light and love,
As if the thoughts that filled his soul
Were gleaning from above.

Were gleaning from allows.

It's spoke, and every tip was lushed,
And every brow was raised;
(And every eye in flot dense throng
Upon the apoaker gazed
And every heart with rapiore thrilled.
To hear the words that fell
Like the crysterious voice that fills
The nurranting ocean shell.

Not softer melis a bird's low song

Vipon the adminer-breezeNot gentler these the breeze away
Among the trembling treeseThan came the article the theiling words,
From his deep throbbing heart,
And yet be knew not, gifted one,
The power of his high art.

I he power of his high art.

Now like the sounding ocean surge,
Came forth his burning words;
Now like the voice of many harps,
Npw like the voice of many harps,
Npw like the innumer of a fulle,
On soft Æbilan strings,
Where we camp rephys pass them by
And words them with thats using

He was most gifted, yet his brow
Had something of despair.
Alas! alas! what could have left
So much of sadices there?
He spake to me of earlier years,
And trembled like a bird,
When, inid the mostic and the mirth,
The "sully night" he heard,

The "stilly night" he heard,
Ah! he was sad, I knew it well,
The's much he strove to hide
The gush of feeling that swelled up
I his bosom like a lide.
Some memories sad ning in his heart,
Were wakeneil by that strain;
He emided must sadty, and his saile
Was sheply feaugit with pain;
And then he turned asule, and—1—

For instance, we admit, if we can save more sends by allowing pewed churches, then we ought to allow pewed churches. And if we can save some in pewed ohurehes that we cannot save elsewhere, and yet savo " none the fewer " in freesent churches, then we ought to linco pawed churches in those spots. But we want something more than mere suggestion, or supposition, or more assertion, to instify an experiment radical in its teadency. If the Methodist Episcopal Church, South, can save more souls by letting some of her houses of worship to theatricals; or if the Methodist Episcopal Church, South, South copal Church; Senth; can save some preaching from Shakspeare's comedies, or Gibben's Decline and Fall, which she could not save otherwise, "and yet save to theatricals, and by preaching the Bible too; then eight not the Methodist Eriscopel Church, South to hire out some of her churches to theatricals, and instruct her ministers to preach from Shakspeare and Gibbon? Who will 11. "We admit, indeed, that if the

proposition were to rejudinte free seats in order to make way fer the pew system, this would be anti-Methodistieni, and our every feeling and soutiment and effert, would be against it. But I. suppose it was designed as a salvo for ruineus breach he is attempting on the strong works of Methodism. proposition were to repudiate free seats in order to make way for the pew system." this, he thinks, would be "mili-Methedistical," and he would oppose it. Now, I submit it to this intelligent writer and every hedy else who has observed the tendency of the "lusts of the flesh, the lusts of the eye, and the pride of life," that if the rule of our Discipline which requires our churches to be built with "free seats" were repealed, would it act amount to a virtual repudiation of free seats and a mighty making way for the pewsystem? If this proposition be true, then the writer is attempting to accomplish indirectly what his own sense of p opriety forbids him to do directly: This would not be permitted in civil jurisprudence; whether it would in the ecclesiastical, I leave the writer to decide. But when there are free seat nishing others, lot them have it. Now here are a part of a community represented as desiring to enjoy the "privi-leges of Methodism" by utterly destroy ieg the one great privilege of the system. Verily, this is enjoying her priviges! THE CHAPLAIN'S SERMON .... HY R. H. COLFAX.

There's sorrow on the sea, boys,
When storms are howling round;
There's sorrow when the framic wimls
In dismal charac sound!
There's sorrow on the sea, boys,
When tempests whistle by,
And frontded waters rage a lea,
And frontded waters rage a lea,

There's sorrow on the sea, hoys,
When gallant fars are slam,
Yet failing in their country's cause,
A prown of glury gain;
There's sorrow when a shipmate dies
Far from his naive land;
There's sorrow when he puying craw
Around hos hammork stand.

Around too hammork stand.

There's sorrow on the sea, hoys,
When finaine marks our days,
When every messimate's famished look
The cannibab betrays;
There's sorrow on the sea, boys,
Yet handsmen have their care
to whither you may please, boys,
And sorrow will will be there.

And sofrow will will be there.

There's sorrow on the sea, hoys,
Bot that shall shortly cease,
And we u port shall find, toys,
Where reigns eternal tence:
There ever more shall we, boys,
At anchor safely rule—
No short allowance there, boys,
But every want supplied.

And there shall we enjoy, boys,
The great Commander's law,
That all who do their best, boys,
Shan double rands draw

And every one new rigged, hors,
On quarter-deck shall be—
No more shall we complain, oys,
"There's sorrow on the sen."

Seme of the principal men were very strenuous in conden none it, and others were in its favor. Oue of the former class told them of a boy who had been so restless, idle, and mischievons, that he was afraid he would have to dismiss him, when the thought occurred to him to give the boy an olice. ### Salvation by Falth.

The simplicity of the Gospel is often a stene of stumbling to the factural man. It is propounded with no imposing ferms; it is preceded by no lahorious initiative its reception dejusnds no gigantie powers ; In short, there is nothing in religion to foster pride of intellect, but much to humble and subdue it. Hence, thewonder with many is, as it once was with Naaman, how such a simple requirement can be effectual for the accomplishment of so great an end. With faith all are l'amiliar, but that faith should save, is unprecedented and in credible. Surely, salvation must have a more majestic cause; there must be something of mystery in order to so great au effect. "We know this man whence he is; but when Christ cometh no man knoweth whence he is." Thus the insutiable appetito for inystery and magnificence rejects as valueless a Sa viour whose churacter is unestentations, and whose whole inductive ceromenial is, "follow me." To the carnal mind i will always be most humiliating to be suved by grace through faith."

This remedy applies just as well to him that "worketh not" as to him that worketh;" long years of lahor do not facilitate this salvation-do not help to loosen the cords of sin hy which the unbeliever is bound—nay, even those things he has accustomed to count as gain," must be reckened as dross to him if he would win Christ. No mun eau enter into the kingdom of heuvon; except he become as a little child. He is not only to become childlike in spirit, but ho is to enter in by doing things which can just as well be done by children. The proud heart of man must at last find a master. He that has runged lawless, and lived as he listed, must how to the Omnipotent so tally as to do any thing which Ho commands. Theu will filinl confidence and love return, and

Consecration

Coasecration to God is an act, and the most solemn and important act we are enpable of performing. Man by nature is devoted to sin, and he seeks the glorification of self, as the ultimate object of his pursuits. The grand design of the grace of God is so to enlighten the minds and impress the hearts of men as to enable them to return themselves to their Anthor and -Redcemer, by a cheerful and voluntary consecration.

. We most honestly apprehend that such is the nature of this net—such is the amount of light requisite to the proper performance of it, that very few, if any, attend to it in the first stage of their Christian experience.

Let'us inquire what it implies, and as we inquire also ask ourselves the ques-tion individually—linve I thus conse-crated my all to God; and do I now stand in that relation?

. It implies a willingness to give up soul, body, time, reputation, and all our earthly and heavenly prospects, to God. an actual giving up of all to God.

The requisition is clear: "I hescech you, therefore, brothren, by the mercies of God, that ye present your boilies a living sacrifice, holy, acceptable butter God, which is your resenable service."
God requires this consecration in view of his mercies, us a "reasonable service, which reasonable beings, in a reasonable way, should perform. The mind being fully satisfied as to the propriety of the step-the heart panting after "full, di vine conformity"—the whole soul cries cut—Lord, I come! 'I we commit my-

This consecration is to be made in faith. When all is to be given to God, it is to be done with unswerving confiis faithful that buth promised." He is pledged to accept the offering presented, and an abiding confidence of this truth is the most important acquisition ever made by a human being. To trust all ia God-to helieve, without a lingering doubt, that he does accept the offering, und to live in that faith, without requiring a sign, and without any sensible manifestation, but simply resting the sacrifice ou the naked rock of eternal faithfulness, is a victory, and triumph over self, over the world, over the devil, the most important over made by a human being. lle who with enlmness, and in. full

### Preaching and Preachers.

We have often observed a districe to he use of the term preacher. Priest, minister and elergyman are preferred. The invariable precision with which the Methodist preacher! A Methodist may be called a preacher; and no liarm-done.

Well, be it se. Preacher is good enough. Neah was called a préacher. Did any body ever hear a high-churchman, of any denomination, speak of his pastor as "our preacher"? It is "our minister."-with scripulous exactness Say "preacher," and he will correct you. How oddly it would sound for any embassader of Christ, but a Methodist itinerant, in answer to interrogatories about his calling, to give in himself as a

### For the N. O. Christian Adve Ethnology-Dr. Bachman, etc.

"The work on the Unity of the Human Race, published by this distinguished naturalist, the first in this country if not in the world, has attracted considerable attention abroad. It is to be published in the German Language. The celebrated Humboldt, after and the third is comparatively low in reading it, sent Dr. Bachman a highly complimentary autograph letter, giving his assent to the leading positions of that admirable work. It will be interesting to the readers of the Sunday School Visitor to know that the papers ou Natural History which render its columns so attractive to youth, are from the pen of Dr. Bachman.

The above statements will be read with some surprise by those who remember the cavalier manner in which Dr. Bachman and his book have been treated by Dr Nott, of Mobile. The latter held up Dr. B. as the increst sei clist in the scionce of ethnology-culo gized German naturalists as immeasu rahly in advance of English and American scholars, and us almost unanimonsly rejecting the nuity of the himman race—quoted Humholdt's Cosmes, and endeavered to press him into the service of his skeptical theory; and, above all, told the world that Agassiz would make Bachman repent having written a book! When, le! the truth is, that such is the estimate put upon Dr. B.'s work in Germany, that it is to he reprinted there—a compliment which will hardly be pald any of Dr. N.'s writings, I trew. And Humholdt, so far from believing with Dr. N., or despising Dr. B., writes, felicitating him npon his production, and endorsing all his leading positions. But Agassiz! he is to demolish Dr. B. We shall see. 11 is an ungrateful task to detract from the reputation of any one, but as this genleman has lent his influence to the support of an infidel theory, and thereby indermine the anthority of the Bible he must expect to have his pretensions scrntinized, and his blanders exposed.

We would ask him, or his enlogizer, if he remembers to have been shown a stuned wolf, on a particular occasion,

gentlemen remember these facts, and ower their tone and pretensions, and specially their threats, a little. That especially their threats, a little. Agassiz is a great naturalist and scholar in some departments of science, no one doubts. But that his opinion upon ethnological questions should be tled to the consideration which Dr. Nott claims for it, is out of the question.
And that Dr.N. him elf should claim

to be an authority on this subject, and upon chronology, is nearly intelerable. He does not venture upon a single paragraph of reasoning, but entertains us with the statement of opinions, and threatens us with demolishing arguments, yet to come. Let us have thom. But let the Dr. remember, that if he throws phyself into the arena of polemic controversy, assailing the religious conthey believe, jeeparding the dearest interests of humanity, he need not think it strange if he find himself held up to merited rebuke. He must not throw firebrauds, arrows and death, and claim to be in sport. We recommend to his gensideration the truly great German principle, that "philosophy and true science are compelled, by the all-pervading nature of divine truth, to include the characteristic doctrines of the Gosnel in the virele of their inquiries." Let the Doctor read the "Footprints of the Creator," and remember the fate of the author of the " Vestiges." ALABAMA.

tions of Paris. It will be nothing mora

than a syuopsis of their origin, government, etc., as a detailed account would prove tedious and uninteresting to you.

The University of Paris, se celebrated in the history of France, is said to have been founded by Charlemagne. It consists of five laculties, viz : Science, Letters, Theology, Law and Mulicine, and is under the control of the Suprema Council of Public Instruction. This Council of composed of four hishops, or arch-bishops, of the Catholic—one minister of the Referm and one of the Intheran Cliurches, and one member of the Israelitish Consistory The President of the Republic names eight members, from the Conneil or from the Professors, and three from the heads of private establishments. The Minister of Public Instruction is chairman of this board. They meet, at least, four times a year, when they give their epinions on all bills of public instruction, act as arbiters in competitions, make all needful arrangements respecting examinutions, give direction to tains to the advancement of science—thus controlling as they actually do all the academic councils of France. The lectures by the professors in those inlectures by the processors in those institutions are all public and gratuitous; their salaries being paid by Government. Appointments to professorships are all determined by actual test. The

only requisito to success is talent-qualification. Influence is not known in their selections; every man, no matter how humble his origin, may aspi to the highest literary post in France and that, too, with hope of success, if he ossess scholastic merit. If oue can ass the severe ordeal of trial through which he is compelled to go, he may place him self at the summit of his professional The celebrated Velican, chief surgeon in the Hopital de Charitte, and favor-

ably knewn throughout the scientific world, is an example of this, and also a proof of the encouraging and fostering character of the educational policy of Frauce. He was the son of a blacksmith, and from the deepes' obseurity has pussed onward and upr vard, un-til he has achieved a name, hoperable alike to him and the institutions of his country.

These institutions occur, ay an unequal-

led position in point of attainment and reputation. Hundred s of foreigners thock hither from all parts of the world to attend the lectures of these velebra-ted prefessors. Our own country is represented here in members, among whom are two of your acquaint-ances from Alabama—J.L. De Yampert, of Perry county, and W. G. Richardson, of Tuscaloesa, both young gentle-men of great premise, and of whom L

prophesy future distinction.

Proving a state of the institution of the institutions of Paris, must produce satisfactory evidence of their proficiou of satisfactory evidence of their proficiou of in certain necessary branches, or de ou ments, recognized as equivalent to the French diploma of Bachelor of Letters. Degrees are also conferred in to reign

languages, which are liere regarded as the same distinction as the dead languages.

The 'Académie Français pur snes a system, authorized and sustained by the lovernment, of awards, most encouraging to literature and science and, as think, ominous of a better stute of merality and virtue than the l'rench have credit for: Prizes an acunting to from five hundred to one thousand doly

lars are annually awarded by it, for the most useful work in correcting public morals—the most cloquent work on Freuch history-the most distinguished act of virtne, Lisplayed by a pour native of France—for works of poetry and of cloquence. Every alternate year, to sumbof three hundred dellars is given to so me indigent young man of letters, who may be found most deserving.

The Academic des Sciences pursues

the same plan of awards, adjudging its prizes to the most distinguished in physical sciences, statistics, experimental physiology, improvements in medicine or surgery, works or discoveries of utility, published and made duriug the yoar, etc. etc.
The Academic des Beaux-Arts makes

its anaual distribution of prizes to stu-dents; for the most superior works of sculpture, architecture, engraving, painting and nusical composition: The hea-ors are bestewed on a graduating scale, similar to the distinctions of our literary nstitutions in America. Those who take the first honer are sent by Government to Rome for tour years, to perfect themselves in their art.

-Franco is truly the foster-mother of genius, as these facts abundantly testiff. In this sho pursues the right policy— the one that has made her what she in point of reputation in lotters, sciences and the fue arts. As a republicationing the country at the means, we are far behind her in this wisely extended patronages. It is to be devoutly wished that our country, with her vast resenrees, will onnoble herself, and centribute her portion toward the progress of intelligence, improvement nd discovery, by waking up on the sull jeet, and acquitting herself in that man ner which she is so able to do.

The annual exposition of the skill of living artists is now going on at the sa-loons of the Palais Royal. My visits there have been feasts to me, although, as you know, I am much inclined to be a matter-of-fact man, with but little po-etry in my composition. I verily be-lieve, though, that some latent elements of it are being agitated somowhat, by oue or two hour gazings upon the wonderful creations of art, in which have been ludulged. I make no pretensious to having the eye of an artist being somewhat defective in julgment of colors, etc. but I am hulf-way porses ded that I possess sancthing within me that artists feel. Whatevoritis, I can give utturnuce to it. This, only, do I know, that, when surrounded by the works of art, as I have been, in the sale loops of the Palais Royal, a most ch-

We can give a general idea of the state of affairs in the diggings, for the necounts from all quariers seem much alike. In all the dry-diggins where there is water, the minera are doing pretty well. In some places where they were troubled with for much water, the yield is better this winter than last. Where the water has failed altogether, the minera have, of course, taken to the rivers, and there the water being very low, most of them are doing very well, with a great prospect before them, for there is no doubt that the water will be himer. for there is no doubt that the water will be hiwer this coming aumore than we have ever seen it in this coming, aumore than we have ever seen it in this coming, and every practicable, part of the rivers will be dammed, and it is out firm conviction that more gold will be taken dat his summer than ever before in California. Honse of Commens, the case of Miss Augusta Taluer gave rise to considerable discussion. The gist of the matter is that Miss T., a step-daughter of the Hea. Chaven Fitzhandinge Berkeley, is worth \$400,000, and has excited the "rapacity of the Romanists." I quote the expression of the papers. She was Tauaton, fer her\_education, in .1841, She is a relative of the East and Countm or Snaewsbury, both of whom are Roman Catholies; and these relatives she often visited while at school in the

For the N. O. Christian Advoca Justification.

Mr. Editor-I feel inclined to trouhlo you and your readers with a few thoughts and inquiries on the subject above named-I mean, the Scriptural or Evangelical doctrine of Justification. A more important one, you will allow,

my dear sir, cannot be named. The Apestle Paul says (Rom. 5: 1) that "being justified by faith, we have peace with God, through our Lord Jesus Christ." What we generally understand hy "being justified" here, is, being ahsolved from the guilt of all past sins. the Lord God of meroy and grace-the sinner being freely and fally acquitted, and there being now no condemnation to him. He is graciously "received," and he "stands in the grace"-the favor and image of God. This is unquestiouably a high and exalted state, especially iu view of the heinous guilt of poor, wretched slnners. Before I preceed to the inquiries which I wish to make, let me say a word

or two now touching the 'nature of the faith" by which sinners are justified. Is it not a confiding belief of the truth-God's repealed truth? I think that dofinition, fairly construed, will bear the test of theological serntiay. Then what had been fully satisfied that all was is the truth believed, in the exercise of justifying faith? It may doubtless be presented, substantially, in a variety of little for the folly of going to help hury forms of Sériptural expression. But as it respects the case of the sinner seeking pardon, this is probably as appropriate form as can be expressed in Scriptural language: " Jesus our Lord was delivored for our offences, and was raised again for our justification." Rom. 4 24, 25. This seems to comprehend the whole " truth as it is in Jesna"—as it the banks of the Woosung River. The whole "truth as it is in Jesus — as it the banks of the workmen had just completed two sub-humiliation and his triumphant oxalta-stantial brick vanits of about two feet truth "unto rightcousness ?" It is not to comprehend or understand it fully for in the act reason is necessarily sar rendered, in humble submission to Ia linite Wisdom. It seems to he a sim ple, hearty trusting in it as the only effected in the southern portion of Lou- of country, and are with great difficulty. He that thus believes to hath the witness in himself." Well, now, I wish to know how it is with the believer, or sincerprefessor, whon he is assailed with the most distressing doubts as to this truth when he is almost overwhelmed with gleem, merely from the ecentrence of difficulties in rolation to the truth, whiol seem almost if not quite insuperable. If an iudividual in this state is not conseions of having committed actual sin is he still justified? May he be at once justified and comfortless? May he be justified, and at the same time be not sure that he is? May he not have "The witness in Imself," nad not recognize Ally hrother who will give his views on this sabject will oblige

So, I'm obliged to sit here over the steam of a little fire of Chinese coal and talk nothing but Shanghai patois, or Nankin Mandarin, with Mr. Lieu, in place of Mr. Cheng. Vorily, I may say of this subject, as Mr. Chong said to the Lord Bishop of Victoria, when he receatly asked his advice on a very important subject-in not bringing him up with mo from Hong-Kong, my conduct was "vulde fatuosus." But if Mr. Chong makos the Bishop as good a substitute for a native proacher as Mr. Lieu now promises to make, I shall not be serry, for there's no use grioving that we have not money enough to keep all the good fellows we get hold of. The editor, finding that he, and everybody else, except the missionaries in Shanghai, know nothing about Shanghai in Chinese talk, and being anxious, like a sensible man, to learn and teach comething about it, went to an acquaint, ance of yours, whom he took to be a sinologue—and begged him to undertake the task of furnishing Chinese enough for the columns of his papor, to h-w came ho-to-bo entitled to change enough for the columns of his paper, to

As Class Meetings are a meaus of grace peculiar to Methodism, ne other Church having any institution resembling it, and as the necessity of it is belioved to be based in a state of things permanent in human nature, the mind the Church ought to be called distinetly to this necessity. A labored, lengthy article on this subject would not be read : we therefore prepese te-cendeuse the main thoughts suggested by the caption into a few brief propositions, in hopo that they may be neticed. The

theory assumes—
1. That it was the design of Christ that his Church should consist of a hely, spiritual mearbership.

2. That the spiritual life in Chrisians, from immaturity in some, and confliets in all, is a principle which needs constant neurishing and culture, in order to its perpetuity, and their efficieney, peace and safety; and that self-inspection and examination is au important element in this process.

3. That persons unwilling to be convorsed with and questioned upon the figures account for many things in the too little concerned and interested upon subject of personal picty and duty, are the subject of salvation to be members

4. That formal dead mombers add n ities of agencies, presses, Conference- Uhurch, whatever their standing or cirstrength, usefulness or honor to the have a small spiritual membership than a large worldly one.

Corollaries: 1. Methodism, when carried out according to its true intent and spirit, furnishes the most therough and perfect pastoral ovorsight and enro of any system extant.

2. When Class Meetings are neglected, a fundamental principle of Methodism is thrown out, by which the whole system is vitiated and its design defented.

3. The Church loses little whon persons leave it from dislike to these meet-

Suggestion: The reason of the grent dislike which many persons have for this means of grace is found in the fact that they are allowed to neglect Class Meetings so long they caunot bear to be interrogated upon the subject. All new conyerts are pleased with them, and would continue to be if they were required to attend them regularly,

Bro. McTyeire—In the New Orleans Christian led to the conclusion that something of a very serious nature had uccurred, which influenced me, to read the arricle. I found it had reference to our brethren in Natchez having let the Methodist Church-in that place to Mr. Barnum, as the most convenien place in which Jenny Llud could entertain the cilizeas with her astonishing musical powers; nowers, surpassing, perhaps, those of any othe tu with admiration throughout Europe and Amer-

An agreement was therefere entered into, and I now became necessary to provide a sultable place for the occasion. Ameng others, application was made for the Methodist Church, and after an interchange of sentlment, it was granted, (not hired, a formance took place, to the delight and gratification of listening hundreds, whose expectations were fully met. This multitude was composed of all classes, professed and non-professed, clergy and laity, and nothing transpired to offend the chastest ear or wound the tenderest conscience, but all were instructed in a knowledge of the sublimity and perfection to which the musical powers of th lory of the case, as it transpired, and of which such bilier cempiaint le made, and over which such lamentable exclamations are used. " As Truth, not Victory, is the mofessed object of Controversy, whatever proofs may be advanced, on either side should be examined with fairness and candor ; and any allempt to custare an adversary by arts of sophistry, or to lessen the force of his reasoning by wit, cariling or ridicule, is a violation of the rules of honorable Controversy." If you are unable to need all advant

sary with reason and accument, you had better let him alene. You may be his superior in wit and artifice, but that is not the question to which the minds of corrers or readers are directed. And moreever, in establishing your claims to superior wit and cunning, you may shew yourself incapable of helding a gentle-menty dehate; and even all this dees net bring us any nearer the truth, in the question in issue. To show that your adversary has himself been guilty of some error or wrong, as great as the ene he writes against, shows nothing to the purpose. It is a trite but true saying, that two wrongs do not make a right. Your opponent may have been wrong now, in this debate. When men attempt. te centrovert the views or epinions of another, they sliculd do it—er if yer fail, fail. You had better fail fairly than unfairly.

The Chancellar of the Exchequer realied that in the time one tax had been reaswed, not In conjunction with, but as a substitute for, import during, and as the basis of the great experiment of the free trade. He, therefore, followed the example of Sir R. Peel—proposed its renewal for three years, in order that they might constitute and carry out free trade principles. "The Advance was manned by sixteen persons, officers included. Her commander, Lieutenani edel Haven, a young han about twenty-six years of age, had served in the United Stetes Exploring Expedition, under Com. Wilkes, in the Antartic seas. He seemed as fine a specimen of a neaman and a rough and ready officer as I have ever seen. Nor was he at all deficient in the true characteristics of a trae gentlemen, although the cognomen is so often misepplied and ill-understood. With a sherp, quick eye, a countenence bronzed and apparently innred to all wastlers, his voice gave immistakeelle signs of energy, prompitade, and decision. There was no mistaking the man. He was undoubtedly well, fitted to lead such an expedition, and I felt charmed to see it.

"His second in command (for they were very differently organized from us) was still younger, and more slim, but withal of equally determined and sallor like any caracte. Next to him was a junior officer, of whom I saw but linde, and that little was enough to tell me that the executives under Capt, de Haven would be efficient auxiliaries to him. Last of all, though not least among them, was one of whom I must be excused for saying more than a casual word or two. It was Dr. Kime, the Surgeon, matarabat, journalist, etc., of the expedition. Of an exceedingly slim and opparently tragite form and make, end with features far more epited to a genial cline, and to the conforts of a pleu-ant home, than to the roughness end hardships of an arretic vayage, he was yet a very old traveller hand by sea and land. I luppened to go on deck when they were this cargaged, and was delighted to witness how gallamly they put aside every inpediment in their way. An officer was standing on the feel of the bowsprit, conning the ship and issuing his orders to the man at the wheel, in that short, decisive, yet clear manner, which the leftmstand and conce well understood and promptly ofteyed. There was not a rag of canvas taken in, nor a moreover when the stream of ic. had to be either gone through holdly or elong detour made; and despite the hraviness of the stream of ic. had to be either gone through holdly or elong detour made; and despite the hraviness of the stream, they pushed the vesset through in her proper course. In his autobiography, John Adams gives the following account of the circumstances which led to the nelection of Jellerson to draw the Declaration of Independence.

ton of Independence.

The Committee of Independence were Thomas Jefferson, John Adams, llenjamin Franklin, Rogor Sberman, and Robert R. Livingston. Mr. Jefferson bad heen now about a year a member of Congress, but had attended his duty, in the Hoass a very small port of the time, and when there had never apoken in pablic. Daring the whole time, I ast with him in Congress I never heard him atter three sentences together.

It will naturally he lequired how it happened that he wan appointed on a committee of such importance. There were more reasons than ona. Mr. Jefferson had the reputation of a ransterly pen; he had been chosen a delegate in Virginia, in consequence of a very handsome public paper which had given him the charecter of a fine writer. Another reason was, that Mr. Richard Henry Lee was not beloved by the most of his collengues from Virginia, and Mr. Jefferson was set up to rival and supplant him. This coold he done only by the pen, for Mr. Jefferson could stand no competition with him, or any one else, in elecution and public debnite.

or declamation, or wit, or sarcasm, or repartoe, or satire, and all these things are very upt to grow out of pablic debate. In this way, in a course of years, a nation becomes full of a man's enemies, or at least, of such as have been gulled in some rothroversy, and take a secret pleasure in assisting to the such as a secret pleasure in assisting to the such as a secret pleasure in assisting to the such as a secret pleasure in assisting to the such as a secret pleasure in assisting to the such as a secret pleasure in assisting to the such as a secret pleasure in assisting to the such as a secret pleasure in assisting to the such as a secret pleasure in assisting to the such as a secret pleasure in a such

That I had been so ohnow low for my oarly and constant zeal in promoting the measure, that every draught of mine would undergo a more severe scratiny and criticism in Congress, than one of his composition. 4. And lastly, and that would be reason enough, if there were no other, I had a great opinion of the elegance of his pen, and notic at all of my own. I therefore insisted that no lesitation should be made on his pert. Heraccordingly took the minutes, and in a dayor two produced tu me his draught. Whether I made or suggested any correction, I remember not. The report was made to the committee of five, by them examined, but whether allered or corrected in mity thing, I cannot recullect. But, it substitute, at tenst, it was reported to Congress, where, after a severe criticism; and striking out several of the nost catorical printigraphs, it was adonted on the fourth of July, 1776, and published to the world.

As to hirths, they were 5279, being some over the ratio, as I to 26 of the whole population, estimated at 128,000. Of nuch hirths were 2581 males and 2598 famales, showing the general excess of the former nex. Of them were 53 twins, making, of course, 106 children. The number of parents to the 5279 children, born the last year, were 10,452, of whom only 3445 were mituee of New England, and 241 of other parts of the United Sintes. Such a computation makes the rest, who were foreigners, 6560, of whom 5526 were Irish. It gives the Inference, that the foreign parents were to the American, as nently two to one! A fact of this sort calls for the exercise of that wisdom which makes suitable provision for the exigency, so that, through education and government, the elements of foreign blas and character may not overmatch those of New England, but be brought under their control.

In the progress of our journey through the Holy Land, our route from Nazareth te Jerusalem, and the intermediate places of interest, carried us directly over the great Central Phiu of Palestine, Esdrelon, here abents eighteen miles across, being its widest part. This plain is the great battle ground" of ages, from the days of Sisera to Napoleou. The soil is rich, producing cotton corn and wheat, though ter reached the fine site of Jezrcel; this is another moderate olevation in the. great plaiu. Here we spread our cloth on the ground and lunched-to the best of our knewledge on "the vineyard of Naboth." The view from the spot was very fine. Two or three marble or limestone Sarcophagi lay on the ground.

During much of the morning-we had a fine view of the Gilbon range, which stretch along eastward toward the Jordan, and they were now high at hand, naked and sterile, as if neither dew nor rain had fallen upon them since the day that David ultered his touching lament over the untimely death of Sanl and path leading towards the castern ox- true, well may the Roman priest say to Jonathan: "The beauty of Israel is tremity and when about half-way up, slain upon the high places; how are the mighty fallen? For the N. O. Christlan Advocate. WARNING TO SANNATH BREAKERS .-Messrs. White and Culbreath, two neighbors, on entirely friendly terms with each other, turned out a few Sabbaths since to hunt turkeys, early, in the morning, and, as they thought, each one was calling a turkey to him. Mr. White thought he saw a turkey through tho hushes—took deliberate aim and fired, and when he came to the spot found he had shet his neighbor, Culhreath, through the head, and he was lying dead instead of a turkey. the agents and patrons of the Advocate. It was a gratifying exhibition of the general interest felt in the success of the paper to see the full board punctually present, with the exception of one, President Rivers. His pressing duties at this stage, of College exercises prevented attendance. We are quite suro an impetus to the subscription work will Centorences to which they have returned. Let not any hand hang down in this enterprise. From representarepresentations in our correspondence, we have no doubt of the readiness, and even gladness, with which people, both in and out of the church, would subscribe to the New Orleans Christian Advecate, if it were only brought before them. A layman in East Texas has put his hand to the work, turned around auong his neighbors, and sent us this week twelve subscribers and thirty dellars in cash, the amount of their advance subscriptions. A religious paper at this point, giving the last commercial and political intelligence, is a moral want of the people of the South and West. A favor is done them by being presented with an opportunity of supplying themselves. Our brethren and friends, therefore, need not he bashful paying in advance will be found an OBLIGED PARTY" in the transaction.

Public Worship - Unity of Effect.

A model preacher has said-"If, in a discourse, I succeed in impressing ene truth upon the audience, I conclude that much has been accomplished." James, in An Earnest Ministry," recommends this concentration of every

have advantages for this, of which we should not be elow to avail ourselves. Not being confined by the forms of a liturgy, but left to eur own choice, we can give a harmony to all the various parts of a service, and make the Scripture we read, and the hymns we sing, as well as the prayers we present, all bear upen the subject of the sermou, and thus give a unity of design and a con-contration of effect to the selemn engagements of the sanctuary. This should be an object with every minister. in order that the thoughts of the people may, without being divided or diverted, flew pretty much in one channel, and toward ene point. Moral, as well as inchanical effect, depends upon the combination of many seemingly small causes. But more especially should the orayers be in harmony with the sermon, and every preacher knows what the ser-men is to be. If he is about to address himself in a strain of beseeching imper-tunity to the impenitent and unheliceing, how much would it tend to prepare them for his appeal if his heart were previously, and in their hearing, to pour forth a strain of fervent pleading with God on their hehalf. They would thus he awed and subdued into a state of mind likely to render the fertheoming sormon effectual, by the blessing of God for their conversion. Such a prayer would be the most apprepriate introduction he could give to his discourse. But then especial care should be taken that the hymn, and even the tune, which interposes between the prayer and the sermon, should not be ef a kind which would divert the current of thought, much less efface the solemn impressions already produced, and hinder the effect of the discourse about to he delivered. I remember to have heard a preacher, who was going to preach a very solemn semmen, hreathe out one of the most impressive straius of intercession for the upenitent I ever listened to, as if even anxious to hegin the work of conversion

The people sat down in soleum awe, when, as if hy a prompting of the wicked oue, whe catches away the seed out of the heart, the clerk gave out a most inappropriate hymn, and the to Manchester. READING SERMONS. .

Upon this subject, he delivers the following sound and practical reficetions. In small space they contain more than the advocates of the practice

likely to repress earnestness, and to hinder our usefulness, than this method be-eeming general. True it is that some preachers may rise up, who, like a few A man, by passing a rope over the living examples, may in despite of this with the aid of a kite, "ascended to practice attain to eminence, technor and usefulness, such as rarely fall to the lot of ministers of any denomination; hut this will not be the ease with the greater number, who, having ne commanding intellect to lift them above the lisadvantage of this habit, will find few churches willing to accept their dullness for the sake of the accuracy with which it is expressed. And who can tell how much greater our greatest men would be, if they delivered their sermons without their notes? Think of WHITFIELD, HALL, PARSONS, reading their sermons What a restraint upon their neble intollects, and their gushing hearts! Where is reading tolerated hut in the pulpit? Not on the stage, nor at the bar, nor in the senate. It is conceded that we lose something of precision and accuracy hy spoken discourses, compared with those that are read; but is not this more than made up by what we gain in impression? By him who slavishly reads, the aid borrowed by the preacher from the eye stone, supported without pillars and graceful action is lost; the link of has many rooms, so that there is do sympathy between his soul-and-that-of the audience is weakened; the lightnings of his eloquence flash less vividly, and charnel-house of those that he and its thunders roll less grandly, for been in remote ages, I thought of this obstruction to their efforts. ### Incidents of Foreign Travel.

At Belfast I went on heard a steame for Glasgew. Passing out of the harber along the coast of Ircland, delightful scenery is spread out to the eye of the beholder. The deep green verdure be gins from the water's edge, and covers the round hills rising in succession one stone cottages in the midst of cultivated patches of miniature form, climbing to the very top of the highest. A pleasant July sun shone upen the various kinds of corn, a name given to all grain and which was under the highest state of cultivation. Necessity is the mother of industry, as well as of invention.
These round hills have been kept in cultivation for ages, and have supported a dense population. Had they they been in some climes, ere this the rain would have washed them to a level with the eccan that surrounds them. The whole landscape is so far in the distance that ne living heing is seen te move; all is hreathless silence, and yet the richly cultivated fields show that there is an industrieus and thrifty population that ahout this business, since the subscriber inhabit this mountaineus region. One generation' succeeds another, and thus they live a whole life, circumscribed by a few miles around from their home. The steamers crossing from Belfast to Glasgow are crowded with deck passen-

The river winds its course through the hills, and seems little like our rivers, lined with hushes and fleedwood. The greensward touches the water's edge. The whole face of the earth seems to be in the highest state of cultivation. The vegetation has a darker green in that cold elimate than that of lower latitudes. Occasionally a lordly palace appears through a spacious and tastefully arranged grove, enclosed with hawthorn. The scenery, for beauty and perfection, is past description. The Scots enjoy it. The river becomes quite narrow near Glasgow, so that twe steamers with difficulty pass, the channel is se narrow. Steam power has made this city, and it claims the first inventiou of steam navigation. No credit is given to Fulton, gation. No credit is given to Fulton, or any one on this side of the water. Little is known of the origin of Glasgow, beyond the twelfth century. St. Kentigarn, sirnamed St. Mungo, is be-Kentigarn, sirnamed St. Mungo, is believed to have been the founder, about the year 560. The superstitious Seets, having an uncommon veneration for over the huilding, in fearful angul having an uncommed veneration for this Saint, collected around his cell in order to share in his devotions. A cathedral now stands upon that sacred the straight gate; for many, I says spet where his cell once was. There is you, shall seek to enter in, and shall a tomb of St. Mungo in one part of the cathedral, and the Saint in full size is seen in hold relief on the top in allying he as he pointed to a shadow that posture. miles-above violating when the fire was first dis-covered. The alarm was given about 4 o'clock, and instantaneously the boat was enveloped in flames. The pilot (to whom great credit is doe) having charge of the wheel, immediately, endeav-ored to ran the boat ashore, which he is part sne-cooked is deing, till, finally driven from his post by the flames, the boat became namenageable, and flames, the beat became namenageable, and tod off again, thus depriving the passeagers of their first and last hope of safety. On the first alarm a scene of confusion casned which it is imalarm a scene of confusion eased which it is impossible to describe, and, mingled as it was with the burning boat, from which the flames were bursting in all directions, become terrible in the catreme. Many hushed, shricking, into the flames, while others, crowding the sides, cluing convulsively to the boat till driven away by the fire, and finally threw themselves into the carrent. It was with difficulty that the Temales could be saved—years of them heing separated from their husbands, and the drift wood. About a durem of the passengers inseed from the bow of the boat, and with difficulty saved their lives by clinging to anage and drift wood. Others crowded late the yavl boat, and, without core, asing their hunds, acceeded in finally reaching the shore. Among the lost is Capand, without cars, using their hunds, acceeded in finally reaching the abore. Among the lost is Captain Rece, of the Webster, wife and one child, who perished in their efforts to save themselves.

As been as the fearful truth was discovered by those swelling upon the abore, three or four boats will call their noble efforts to save life. By this praises were ably then aff and carried to the west with conduct, many that were still hanging to the many were ably then aff and carried to the boats, which, a violent was the carrent, but few of them could have hoped to reach without maistance. As soon as it was possible to reach the sufferers, the store-boat Grey Eagle, Capt. J. L. Case, wont so their ald, and did all that could be some, by affording an explum to the shivering we-

case, went to hear and, and dut an instead of one; by affording an explunt to the shivering women and children that crowded the bank. The number of passengers and bands amounted to about me hundred, of whom but airty or seventy can be one hundred, of whom but sixty or seventy can be found. The ateamer New Orleans, Capt. David Whitten, from St. Louis, bound to New Orleans, hova in eight about one hour after the accident, and kindly took off the passengers, and rendered all the assistance that cauld be given. It is feared that the destruction of life has been great, but there are hopes that many of the missing may yet he found alive. These are the simple factly as near as can at present be ascertained. FRAX CUTTON IN GREAT BRITAIN. - The London currespondent of the Commercial Advertiser mays of flux cotton: "The use of flux votton, manufactured according to the process of Clevatier Chausen, is now the progress upon an extensive scale; as Hradford, in Yorkshire, and at Cork, in Ireland, large mill owners at those places having entered into contracts. The principle of the flux vention, by which flax is adapted for apinning upon cotton, wool and wilk machinery, consists in the destruction of the cylindrical character of the fibrs, by the expansive power of carbonic acid gas. The first process, however, is the removal of the resingus reader poculiar to the plant. This is effected by boiling it for three hours in water; containing one half per cent. of common rode, after which it is disped, in water slightly acidulated with subpluric acid. The flux is then thoroughly saturated in a colution of carbonate of sod, and being subsequently immersed in a solution of diluted sulphuria acid, a literation of gas takes place which causes the unless of which the plant is composed to aplit, when the material, instantly lowing its rigidity, become a light, expansive mesor corten texture, increasing in size, like leavoning dough or an expanding sponge. Lastly, for the purpose of being bleached, it is plunged into hypochurite of magnesia, when it instantly becomes white. A very general apinion prevails that the invention will lead to rapid and extraording propagate for the Manchester market. don currespondent of the Commercial Advertises onys of flux cotton: "The use of flax Fotton, man-

A REQUIAR HRANDY SMASHER.—An English paper says: "The late Mr. Joshua Dixon, of Downtown, in Withshire, who in 1801 died suddenly at the age of a hundred and throe, had all of his life been a remarkable free livor. According to his own calculation, he had consumed twa thousand gallens of brandy, without taking into account a variety of other kinds of liquir. He moreover, enjoyed his faculties to the last. He was twice married; and of his ouncrous ellspring by both wives, the oldest had died in the age of seventy, while the youngest was only eighteen, at her fathwhile the youagest was only eighteen, at her fatter's death. Had this man practiced the temperacof some patriarchs, he might probably have a same that age of a hondred and fifty."

When will this work coase to be called mission work, and the preacher to the pegroes a missionary? Masters have an interest in this matter of having their slavss preached to and catechized, and ought no more put them on the mission list, proper, for their spiritual instruction, than they should put them on the parish for their meat and bread. The Catholies have a large brick church here. I found that the Methodists had been the pioneers of the Protestant religion. In Terrebonne parish they planted the banner of the cross huilding two churches, one at Houma, and the other at Tigerville. And here, n a stronghold of the Catholics, they had creeted a fort from which to wage war against sin in all its forms. I say the Msthodists built these churches, for they led the way. Alabama. — The Selma, (Alehama) Southern Easterprise, of the 5th inatanl, ease:

We have taken some trouble to ascertain the present condition of the cotton and eorn oropa. The cotton generally is very backward, and judging fram the prenent oppearsace, a very small crop must be mado. The weather has been very cold; and raiss and winds here all contributed to keep back the young plant. This is not only the cost in the same present in the same present the same present in the same present present in the same present appearance of the course crop is elso bad."

Virginia Convention — The White and Mized Bases — A vote was taken on the 1st inst., in the Coevention, upon a motion to strike oot of the report the "white hasis" proposition, which tesulied in striking out—yeas 65, nays 36. The proposition to insert the "nilaed hasis" was also vious by e vote of 60 year to 61 neys. A compromise schema was then affered by Mr. Botts, to which Mr. Saunders offered an amondareat to give the lower House to the "white hasis," and tha Senata to the "mixed besis." The question appears to be sarrounded with difficulties.

Meadame Gries and her Hussiand.—By the deed of constition of the celebrated unger, Grisi, and her transland, M. de Meley, he was to have the peoperty eigense iros werks at Chittery, but as the revenue arising from them, was nacertain, it was farther etipulated that the wife abould pay him ten themsand france a year as long as she should remain as the stage. The counsel pleaded that the revolution of February had as injured her in her professional pursuits, that she was no longer able to pay so large a sum as 10,000 france a year, and offered in lien of the arrears due, to pay a sum of 10,000 france. The counsel for M. de Meley denied the truth of the attenuant made as to the reduced means of Madame Grisi, and entered into a detail of the sums received by her at different theatres, etc. He mustissed, smoug other things, that when la Rawais, and in particular a wreath for the head, valued at 20,000 rubles (about 120,000 france) which had been purphased by subscription, the Emperer himself having anbeeribed 10,000 rubles. He stated, also, in reply to the advocate of Madame Grisi, who, after having alleded to the abundonment of the Italian Opera by the aristocracy, in consecutions of the reventation, had described the attempt of his client to find a compensation in London as misterimate, that she had not been a locer to the remaining that the had not been a locer to the remaining that the she had a compensation. The Court, after weighing the sustements and arguments of the course of the

in render his re-election impossible by the letter, of the constitution. Yet the election of any other candidates would probably lead to civil war. Other candidates would probably lead to civil war. Other candidates admit this. The Count de Chambord, like Lord Stapley, is not ready. The Orleans princes, the Graham and Gladstone, would rather wait. And we verily believe that if Lonis Napoleon like Lord John, were to fing down the acepter, the people and the National Assembly would be compelled to crave and beg of him to pick if up again. If Lord John Russell had not realgned, he would now be the weakest and most budgered in ministers. If Louis Napoleon had resigned, he would now be the weakest and most budgered in ministers. If Louis Napoleon had resigned, he would have been ere this recelected, dotationed, and smeakered with addresses of attachment and congratuation.

In sace of such conduct, there has been nothing bet a series of negotiations and mancouvers, wheeling of this party, deference to that. At one time, the President thought he had got hold of the Legitimists; at another, M. Harnot was thought to be propiliated. The Orleanists, though so attainedly led by M. Thiers, suffered, notwithstanding, the greatest of affonts in the Assembly, where, when the recall of their princes was proposed, as had been done with regard to the Imperialist family. M. Berryer limself got up and set, the froposal aside to the mustrous adhoyance of his quondum ally. But with all his no progress was made towards a, settlement, or even towards such a temporary settlement as the re-election of Lonis Napoleou would imply.

Fears at largelt legan to be enterinhed that a prolongetion of such upcertainty would lend to popular troubless. Each party in the enter getting up to declare that silell and such contingencies would lead to civilywer, whist was quite certain that some one of these condingencies must of necessity occur, it became nutting the have been even in the reason of order, howarer unable to united all saffrages in their f

new ministry under M. Leon Faucher, and M. Baroche.

M. Barrot refused to accept office, eacept on the condition of being allowed to mitigate the law restricting, indeed abolishing universal auffrage, and thus allow-one more to the industrious population the right of franchise. This, according to M. Barrot, was the best mode of preventing crustle; and in this opinion M. Barrot, was supported by all the moderate Republicans. The Legitimists, also, especially the Lerohejsquelin section, were for the same concession. The restriction of universal stiffinge has greatly diminished the numbers of Legitimists votes in the provinces, and they are unxions to recover tham, even by the aid of the Mountain.

But these proposals of M. Harrot, were displanding to the men of order, to the Orleahist, who do upon concession to the people as the forerunner of a new revolution, and instead of closing with M. Barrot's ponditions, Louis Napuleon has appointed a ministry on the principles of order and no concession to the people as the forerunner of the men of the principles of order and no concession of the law of the 31st of May, restricting the fuffinge; and undoubt, as Minister of the Interior, he is determined to maintain and enforce that law to the very uttermost. It remains to be seen wind amount he has of a majority to carry out that like With respect, to, the President, such a choice.

amount he has of a majority to carry out that the of rolley.

With respect to the President, such a choice places him at war with the moderate Reparations and still be shens eny thing hat ecced with the Legitimbts, and whether it conciliate the Orleanists is doubtful. Thus, although the new Cahinet tany be a more vigorous, efficacious, and able one, cumposed too of parliamantery men, it is doubtful how for it can further the great and alsorbing aim of the President—his coalinuence in power. Later from the Cape of Good Hopel The Propostis had arrived at Plymouth, bring-ing advices from Cape Town to the 7th of March, and trom Fort William, the head quarters of Sir

Harry Smith, to the 23d of February. In the following narrative, compiled from her navices, the lowing narrative, compiled from her navices, the principal events of the war are recapitaleted:

The main hody under Sir Harry, nbont 4000, strong, still remained at King William's Town, and had only been partially occapied in razzias nagainst the kranla of chiefs, and in throwing reinforcements into the beleagured forts. The most notable incident in the news by this strival is the recapture of Fort Armstrong from the Hermanus reliefs.

On the 30th of January Colonel Mackinnon succeeded in relieving Torus White and Cox, by throwing aix weeks, provisions into each. The operations were not unattended with danger, but without eny loss. Considerable numbers of the Kaffirs were killed, chefly with shells.

On the 3d January, the Commender-in-Chief having received dispatches from Generel Somerset, issued a proclamation, in which he referred to his problamation of marrial; law, calling upon the horighers to move sgainst the enemy, end to nasist in tepressing the rebellion of the Hottentota, who were making common causs with the Kaffirs. He animadvited upon tho want of energy which had been menifested on the 'part of the inhabitants, of the frontier districts, many of whose femilies end properties would be in consequence, if they were nut already, at the mercy of the insurgents; and lifecalled upon all loyal inhabitants, between the ages of 18 and 55, to place themselves under the order of Gen. Somerset for the defence of their consequence.

interalled upon all loyal inhabitants, between the riggs of 18 and 55, to-place themselves under the orders of Gen. Somerset for the defence of their country.

On the afternoon of the 3d of February, Lieut. Col. Nepier, C. M. R., with a force of about 1100 men in Gape copie, 73d regiment, and Swellendam and Gemelonal lavies, proceeded to the Umgazini river, west of Fort White, for the purpose of intercepting Seyolo lifease he should attempt to move into the Galke country, on Col. Mackinnon's approaching his kreat by the direct route. On the murning of the 4th, Col. Mackinnon, with a force of 1150 fren of the Cape corps, 73d regiment, and Riversdale end Albeny lavies, and Fort Peddie, Fingres, marched to Seyolo's kraal, on Line Drift, without opposition, and destroyed it. He then joined Lieut. Col. Napler, who had roported n large body of Kaffits in the heighborhood, but upon the two forces joining, the enemy retired, and the lateness of the hour did not permit of pursuit.

On the 5th inst. the whole division proceeded to the Prophet Unlangeni's kraal. The Kaffits in the kmal afterder opposition, they, now ever, dispersed on the approach of the troops, who then proceeded to the kraal scituole on the Keiskmuns, e few miles below Line Drift. The kraal was destroyed, and in party of the Cape corps and Fingoes were dispatched in pursuit of the catta; they returned tate, having captured about 800 head. On the 613h of February a column of nearly three thousand men marched to Fort Hyre to reinforca Gen. Somerset; and, after peforming some desilitory evolutions about the Chumie, the column returned to King William's Town on the 19th lighting all the way with the Kaffirs, who attacked he great numbers and with the numost retarmination, threw the levlee into confusion (as the reports go) and were only beaten back by repeated charges of the galiant 731. The Houston Ranger says:

Colorado Raft.—We have been informed by Col. Wallace, that the sleamer Kate Ward has been engaged by the coarrectors for removing the 1sft in the Colorado, and above tweaty heads have been set to work upon it. The committee have determined to remove the raft instead of cutting new channel, by what hes been styled the "Kate Ward shute." The planters along the whole line of the river have subscribed very liberally for the work, and are datermined to spare no exertions to remove the raft this sesson. Col. Wellaco stetes that those who have, formerly considered the ramoval of the raft impracticable, are now sanguine of success. They espect by next naturn that the abstructions in the river will be removed, and steamers will ply regularly hetween the bay and the landings above tide-water.

Navigation of the Grandelupe.—The Victoria Advocate of the 24th ult. says: "The regular navigation of the Grandelupe may now be considered as fairly started." The steemer Wm. mske such resistence as to put the savages to flight.

Only four ladiens were seen, but it, is supposed that there were about fifteen in the party. One of them weatured boldly into the town, end succeeded in capturing a velueble lorse belonging to Mr. Carrigen. Mr. C. afteripled to repel the introder, by discherging a "five-shoots?" at him, but, unfortunately, the caps exploded, end he was compelled to retreat, the Indian following bim up with a shower of arrows.

The perty surprised, and two of whom were killed, are supposed to be from the Colorado. The Americen thet wes fatelly shot, excleimed as he fell, "O, my poor wife end children?" which circumstance leads to the supposition that he had a family. He bad e belt eround him containing \$1800 in gold. The other American, also, had \$1000 in gold, secreted in the sance wey. But the sevegea seemad arore intent upoe the acquisition of horses, thas guld or aliver, or even of scalps, for on this occasioe they left their victims without any other traces of their harbarity, than the wounds inticated by their arrows, or the arrows themselves.

APPRAY AT THE UNIVERSITY OF VIRGINIA.—A tremendous excitement has been caused by a difficulty between the students and the Professor of Modern Languages. The former, having become incensed against the letter; got bold of his horses, seels them to death, stampede fashion, painted them white, and then, turned "than loose. When the Professor resented this with writs of arrest, and the Sheriff proceeded to execute them, he was cut with a bowis knife. Finally, the ring-leaders were apprehended and sent to jail, but the students marched down and released them. The excitement against the Professor is very great.

Arrival from Santa Fa.

We are indebted to our friend, Major Fogg, of the city Hotel, for on introduction to a party of gentlemen who arrived yesterday, in St. Leuis, from Sante Fe. The perty consists of Fion. H. Connelly, late Governor of the Territory, and Messrs. S. M. Whitter, Y. Otaro, Juan Poree Jose Griturges, and S. Griturnas. The four latter gentlemen, natives of New Mexico. They reched the city on the steamer Saraaak Iron Independence, yesterdey morning, and left Sante Fe the first of April, and Begas, on the aixth.

We have conversed particularly with Mr. Whitlock, who is a resident of Santa Fe, whither he, will return in the spring. There is very little stirring in New Mexico. The Apeches hedbedeen very troublesome, but a treaty of amity hed been effected with them through their most formidsble chief Checon, by which he obligated himself to meintain the peace on the penalty of forfeiting hia head. The Mexicans are very well pleased with the new government, especially since the power has been taken out of the lends of the military. Business wes quite brisk at Sante Fe-end e-number of milits were under construction in the neighboring towns. They were making quite spirited preperations when his party belf, for an election of Territorial ollicers, which was to come off in a few weeks.

THE UAE OF Moequittors.—I never knew mosquitoes turned to any good account save in California; and hare it seems they are sometimes ministers of justica. A rogus hed stolen a bag of gold from a diggar in the mines, and hid it. Neither-threats nor-persuasion could induce him to tell the piece of its concealment. Ha wes ut last sentenced to a hundred lashes, end then informed that he would be let off with thirty, provided he would tell whet be bad doae with the gold; hut he refused. The thirty leshes were infloted, but he was still stubborn as a mule. He was then stripped neked end tied to e tree. The mosquitoes with their long bills weat at him, end in less than threa hours he was covered with blood. Writhing and trembling from head to foot with esquisite torture, he exclaimed, "Unite me, untie me, and I will tell where it is." Tell first," wea the reply. So he told where it might be found. Some of the perty, with wisps, kept off the still hungry mosquitoes, while others went where the culprit had directed and recovered the hag of gold. He was then untied, washed with cold water, end helped to his clothes, while he muttered, es if talking to himself, "I couldn't stend thet enyhow." [Colton's Three Years in California.

Washington derived his descent from Williem de Herthurn, Lord of the Menor of Weshington in the English couety of Durhem, in the thirteentl century. By the intermerriege of one of the de scendants, George of Silgruve, with Eleenor daughter and hair of John Hastings, Weshington was cutitled to querter the arms of Hastinga end other illustrious and noble families, end hed among his encestars Richard Trevil, Eert of Warwick, the "Kiog Maker," King Edwerd the Third, Edwerd the Second, Edwerd the First, Henry the Third, King John, Henry the Second, Henry the Third, Kung John, Henry the Second, Henry the First, and Williem the Conqueror. Advices, public and private, were received here yesterdey, which render it probable that come portion of the Cuban inveders have actually sailed.

We may have some account of tha fact to-morrow.

It appears, from eccounts just received, that the expeditions of the inveders are as wild as their project is desperate. All that they ask for is to be able to land-two thousand troops, which they think they can do, if not intercepted by the navy of the United States, and there the whois Creola population will, as they say, raily in support of their revolutionary standard.

The Spanish army, if not already corrupted, is to be immediately brought, by promises of booty, and of revenge against their arbitrary officers, into the support of the revolutionary movement. Let us, they say, strike one hiow—show one victory—and we shalt raily eround our standard nine-tenths of the Cuban population, and of the Spanish army, and then nothing cen prevent a vast influx of American volumeers from cases; pare of the United States, to whom fighting is familiar and agreeable, states, to whom fighting is familiar and agreeable, must will be throught round to his box, to be introduced, and paid him mensy compliments. The negotiation was rather a difficult ona, as Paganini was, of all others, the man who did anthing in the way of business without an axplicit understanding, and a oterly dafined consideration. He was alive to the independent of the honor, but the toved money with a parameunt affection: I knew that he bad received enormous terms, such as £200, for fiddling at private parties in London, end I tremhled for the Vice Regel patres; but I undertook to manago the infielr, and went to work accordingly. The ald-decamp in waiting, called with me on Pegeuini, was introduced in due form, and hunded him a cerd of invitation to dinner, which, of course, he received and accepted with ceremonious politicess. Soon after the officer had departed, he said suidenly, "This is a great honor, but am I expected to bring my instrument!" Laves surely through some in the mesery;
For free qualitations it could not be.

For froe itself alone it could not be.

Created Yest Thy Wissiom and Thy Wood

Created ma! Thus souther of Life and Good!

This Strict of my spirit, and my Lord!

Thy Light, Thy Love in their bright plentiade

Filled ma with an immortal Auni, to spring

Over the abym of Deuth, and be to it wear

The garments of Elemin Bay, and efficig

Lit heaven's flight key and this livits aphere.

Even to its souther, to Thee, its Anthor, Thee,

O shough be effaths. O vision bleet!

Even in its source, to Theo, its Anthor, Thee, O shough harsfable. O vision blest! (Though worthless near conceptions all of Theo) Yet shall the shade well image all our breast, And wast fits homing shome to the Deity.

On I thus alone my lowly I houghts can soar!

These seek the presence. Belief with and good! Midet the vast workt, admire, obey, added!

And when the Tongris is elected no more.

The Boul shall speak in tears of gratifieds.

extraordinary liberality was gratitude for the grace of God, which thay had rebeived. It was not to gain a name oeived. It was not to gain a name among the churches, nor from a griping sense of reluctant duty, but from leve to Jesus. Christ and to their brethren. They had given themselves to the Lord, and supposed that the consecration included their property and toil.

What an excellent church was this!
O, that all our churches were equally consecrated and bountiful.

If any of our readers have any onriosity to lenrn more concerning these no-ble disciples, I am happy to say that a very interesting statement of their devotedness, has been published. They may find it in a work called "The Second Epistle of Paul to the Corinthians," and in the 8th and 9th chapters.

Watchman and Reflector.

PAUL'S EPISTLES.—The lengest of them are shert. There is not a day but letters, longer than those to the Romans or the Hebrews, are passing from country to country and olty to city. Paul's letter to Philemen is a mere card. And yet, round these little notes, piles of commentaries have darkened from them, as from a point of separation, sutire seets have diverged; over them, alsa | blood has been spilled; and in them lie mysteries, the very edge of which has hardly yet transpired. Of what spries of letters out of Serlpture, but these, can the half of this be said? And the power, thus ledged in them; what can we call it if we call it net divine? No

we call it if we call it net divine? No charlatan, no fanatic, no pedaut, no mere geaius, eculd, by such brief touches, have so roused the "majostle world".

For mark, these letters, while making no pretensions to literary merit, while recerding no new miracles, do announce the anselves as from the Lord, and do testify to the supernatural character of Jesus Christ, did therefore commit their credit, and that of their anthor, to the entire claims of Christianity, and expose themselves to severe tosts and to the keepest sorutiny. And it is because they cause forth from this triumphanily, and mado the prejudiced confess their truth and feel their power, that they are wilvo nad sliine, as though written in stars upon the page of the beavens.

Bards of the Bible.
